SEE YOU TOMORROW

We are sending our graduates out into the world with a bang. As they move on to the next chapter of their lives, we will be looking forward to their upcoming adventures as they reshape the world.

This year, the graduating students are from the foundation, bachelor's and master's programmes in the departments of Interaction Design, Digital Marketing, High-tech Entrepreneurship, Data Science, Fintech, Computer Science, and Maths as a Second Language.

In this booklet, you will find information about our graduating students and their experiences of studying at Harbour.Space University. You can also find details about the main projects they are pitching to the investors during the Demo Day.

During this past year, our students have worked hard and gained experiences that allowed them to achieve substantial growth in both technical and social skills in the newly emerging fields of today. In the future, we will be looking forward to seeing them prosper in their careers!

We have created a pamphlet as a look back on your educational journey that you braved alongside us, and we hope that when you look through it, you'll remember all the great things you've accomplished during your time in Barcelona. We certainly will!

Kamran Elahian

Harbour.Space University Founding Advisory Board Member, Founder and Chairman Global Innovation Catalyst LLC

Ingo Beyer von Morgenstern

Co-Founder and Chairman of Harbour.Space University, Emeritus Director McKinsey & Company

We believe careers should be fulfilling, exciting and meaningful. We exist to make this happen. Attending university is as much about finding your feet in the world and discovering your own drive and passion as it is about acquiring skills, knowledge and experience.

From day one at Harbour.Space, your prospective career takes centre stage and we facilitate your development, your networking and create opportunities to help you take charge of your future. What comes after Harbour.Space? The sky is the limit. Don’t be shy, reach for the stars.

Svetlana Velikanova

Co-Founder & CEO

HARBOUR.SPACE
UNIVERSITY

About Harbour.Space University

Harbour.Space is a university created by entrepreneurs for entrepreneurs. We focus on meeting the demands of the future, while traditional education providers are too often stuck in the past.

We're one of the only European institutions completely dedicated to technology, design and entrepreneurship, and our interdisciplinary courses are taught by some of today's leading professionals. Our aim is not only to equip students with the knowledge to take on the real world, but to nurture, create and shape tomorrow's tech superstars.

Key Facts

· Founded in 2015
· Offers degrees in Computer Science, Data Science, Cyber Security, Front-end Development, Fintech, Interaction Design, Digital Marketing, High-tech Entrepreneurship and Super Cities
· Faculty comprised of the most accomplished professionals and industry leaders from around the world, who continuously scrutinise the curriculum to ensure students focus on realtime useful subjects
· On our state-of-the-art campus knowledge flows freely

Time ≠ Money

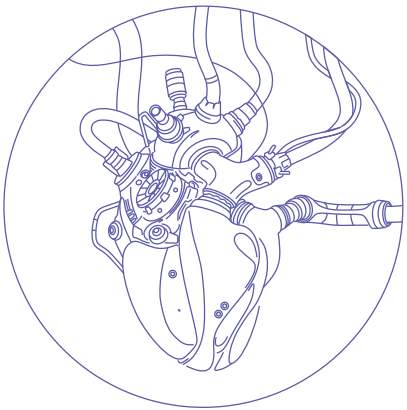
Youth is not for sale. That's why we teach highly relevant and real-world responsive courses that give students a head-start even before graduation. Our programme leaders continuously scrutinise the curriculum to ensure students focus on realtime useful subjects. We teach 3-week intensive courses throughout the year, offering more learning in less time, on flexible and adaptable schedules.

No compromises

If you get a place at Harbour.Space, you get the best education. The programmes are tough and our students must work hard. We don't sell quick-fix coding or data science courses, because they don't exist. Only with very solid foundational knowledge of universal core concepts in science can students grow to move forward indefinitely, no matter how much the world around us changes.

Tech ♥ Design

Great ideas and their realisation seldom come from specialists: they come from all-round visionaries. But presently, technology and design are in an arranged marriage: they are together because this is what's expected. We are cultivating a love marriage between the two, and we are the only university in Europe to do so. We're doing this because the two naturally depend on one another, but experience a great lack of understanding. Interdisciplinarity is our love potion — expect sparks.



Students are superstars

Harbour.Space exists for one purpose only: to help young individuals pursue knowledge, so they can progress into fulfilling and meaningful professional futures. We offer the fundamental knowledge, skills and guidance that give students the chance to make anything happen. We celebrate our human approach by cultivating team work, interdiscipinarity, empathy and curiosity.

University reinvented

Leaders in business are the students' personal teachers. We don't care about titles and we don't do red tape: we hire teachers based on experience and expertise, just like in the real world. We are the most relevant university of our age.

GET TO KNOW THE GRADUATES

Master in Data Science

Ahmed Al Manji

https://www.linkedin.com/in/ahmedalmanji/

Short bio:

Ahmed was born and raised in Oman. He received a scholarship to study in a boarding school in the capital from grade 6 and another scholarship to the US to study Mechanical Engineering. After working for a couple of years as a Technical Analyst at Phaze Ventures, he got a scholarship for the third time to study Data Science at Harbour.Space. He started building a startup called Pyra to help investors with their end-to-end deal management process.

Project:

Pyra

Top 5 skills:

Data Analysis

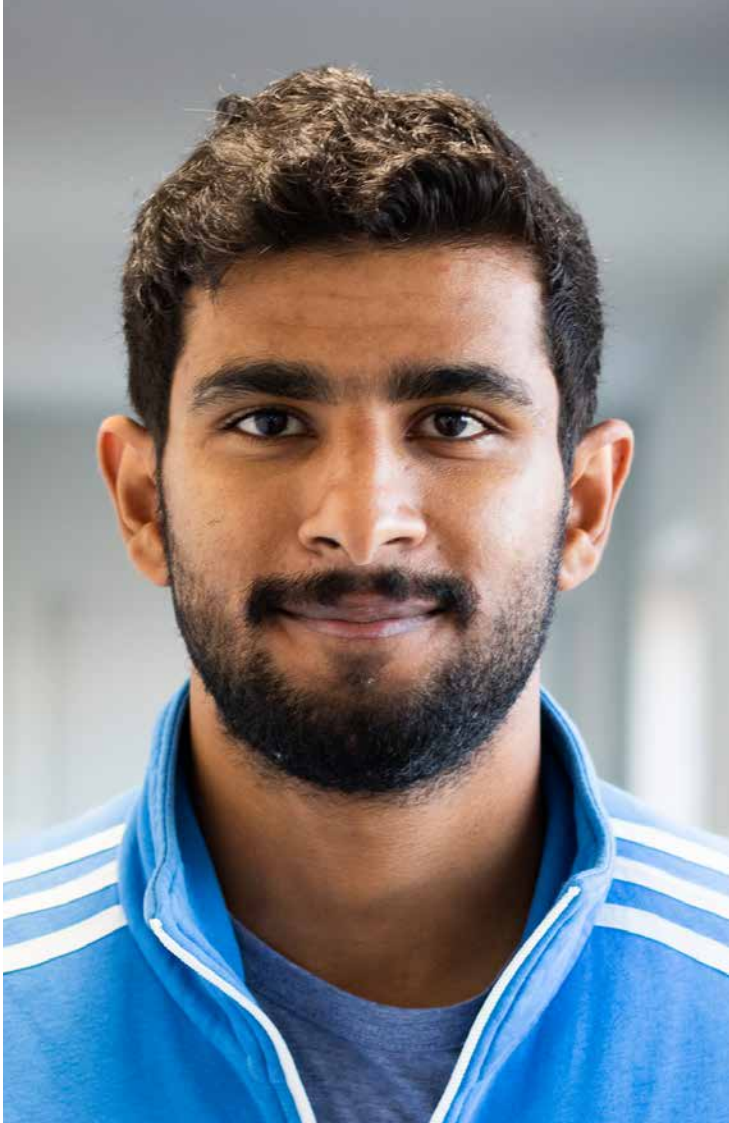
Machine Learning

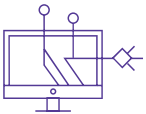
Leadership

Project Management

Python

I am a firm believer, the friendships and connections you make while studying abroad are far greater than what you learn in the classroom. Many of you already know that I travel and go on adventures. So, this is my invitation for all of you to visit Oman, and I will give you a personal adventure to Oman's hidden gems.





Master in Computer Science

Alejandro Martínez

https://www.linkedin.com/in/alejandro-martinez-rivero-116836120/

Short bio:

Alejandro is a Mexican student who took his savings, hopes and dreams to move to Europe and study at Harbour.Space after working in the financial industry in his country. Having worked as a Software Developer before and since the world of Artificial Intelligence was intriguing to him, Harbour.Space was a great help to expand his knowledge in data science. After leaving HS, Alejandro plans to maximize his impact in the Latin-American region using his knowledge to help small communities get included in the digital world we live in.

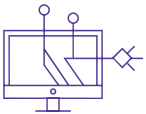
“It gets easier, every day it gets a little easier, but you gotta do it every day, that’s the hard part” - Jogging Baboon | BoJack Horseman



Master in Computer Science

Alex-Gabriel Simion

https://www.linkedin.com/in/alex-gabriel-s-4191a4128/

Short bio:

Alex was born in Romania and completed a Bachelors in Computer Science in his hometown at the University of Bucharest. With already some professional experience in Software Development, he was looking for the next challenge. So, he applied for a position as a Backend Engineer and was also awarded a scholarship that would allow him to complete his MSc in Computer Science at Harbour.Space. During the one-year programme, he learned a lot about the newest technologies in the field, like Neural Networks and Computer Vision, while working part-time for Leagues of Code as a Backend Engineer.

Project:

Leagues of Code

Top 5 skills:

Proficient in PHP, Java, Python, C++

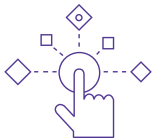
Problem-solving Capability

Designing & Implementing Web Services

Designing & Implementing AI Models

Communication

This year went by extremely fast. So many things happened that it is still hard for me to process everything. From moving to another country, having challenging courses every day and working for a startup while enjoying the summer weekends in Catalunya. I met many inspiring and talented people that I want to keep in touch with for many years to come. I learned a lot in a technical manner and a social one since I was able to see how people from around the globe perceive life.



Master in Interaction Design

Amir A. Karim

linkedin.com/in/amir-alexander-karim-a05a7819a

Short bio:

After spending his 20s studying International Development and working self employed for several years in the Travel Industry, Amir decided for a career and life change by studying Interaction Design at Harbour.Space. Originally the idea was to continue working on a project related to Tourism in Vienna, Amir's hometown. But, instead, Barcelona and the university changed everything, opening up a whole new world to explore UX & UI further internationally.

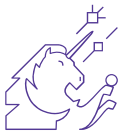
When looking back at this in a few years, I want to remember all the good moments we shared together - Friday pizzas at Mogollon's and late night project hours at Harbour. Space, working with a sea view, drinks in El Born, debates over the best typefonts, colors and animations - as a group we all bonded very quickly and I wish we had more time.



Master in High-tech Entrepreneurship

Anastasia Sarapulova

https://www.linkedin.com/in/anastasiasarapulova/

Short bio:

Anastasia was born in Ekaterinburg, Russia. She pursued her Bachelor's degree in London studying Data Science, but turned 180 degrees and decided to become an Entrepreneur. Her passion has always lied around a healthy lifestyle and healthy eating, but only in Harbour.Space she has believed in her ability to follow the passion and build a business idea around it. `more.' is a brand of Anastasia's "nutritionally-balanced food delivery" business. She is planning to launch it after graduation and make the world a healthier place!

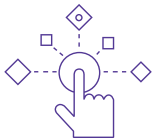
Without exaggeration, this year in Harbour.Space was a beautiful journey worth taking. I was surrounded by smart, unique and inspiring people throughout the whole year. Each of you will always stay deep inside my heart, and I am happy I have managed to develop such deep friendships and connections here. This year was full of challenges, personal development, lessons and happiness, as well as disappointments. But as we all know, there are no ups without downs.



Master in Interaction Design

Anna Egorova

www.linkedin.com/in/anaegorova

Short bio:

Anna Egorova was born in Russia with Armenian roots. After pursuing a career in law at the Moscow city parliament, she switched her life towards her passion and studied Foundation in Arts and Design at the British Higher School of Art and Design in Moscow. She pursued her studies in London at the Camberwell College of Arts with an exchange semester in Rotterdam and obtained a Bachelor of Arts in Illustration (First Honors). Anna continues her professional journey at Harbour.Space in the ID programme. During the last years, Anna worked amongst others for Walt Disney Company in Moscow and in London, CULT, iCrossing, Harrods as a graphic and digital designer. Anna particularly enjoys visual design and teamwork. In the future, she plans to work as a visual/multidisciplinary designer in an entertainment or game environment.

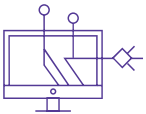
Harbour.Space was a great experience, an intense year and full of new knowledge, hard work, short nights but also friends and tremendous fun and learning. I am grateful for the opportunity to sharpen my skills and to understand how to develop my career. Personally, I experienced how important it is to stay in balance throughout the modules. I hope we keep in touch as we have become one big family this year.



Master in Computer Science

Berend Jelmer Dirk Gort

https://www.linkedin.com/in/berendgort/

Short bio:

Life as a Dutch kid included building things: LEGO, paper aeroplanes, crossbows, sheds, boats and cars. After that, he studied Robotics Engineering and constructed parts for drones, a fusion reactor and satellites. But then, a realization occurred, he was always missing a piece of knowledge about coding infrastructure. Thus, he decided to come to Harbour. Space in Barcelona to learn about AI & Computer Science. Name a better duo than AI & Robotics, he will wait.

Top 5 skills:

Control Systems Design

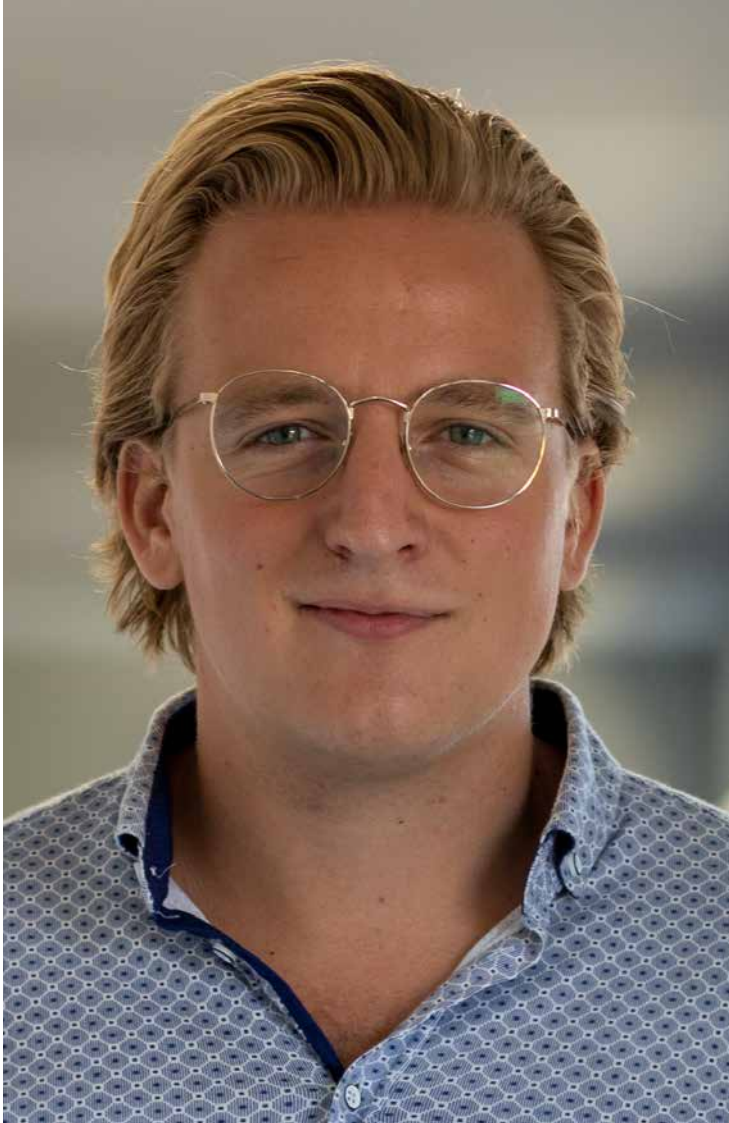
System Identification

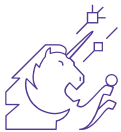
Control Theory

Computer Vision

Artificial Intelligence

If you do what everyone else does, you will get what everyone else gets.” These have become the words I live by day by day. If the herd goes in one direction, try not to follow like a mindless zombie. The probability is high that it will not make you happy as a person. Do your own thing, be creative!





Bachelor in High-tech Entrepreneurship

Carl Philip Blücher

https://www.linkedin.com/in/carl-bluecher-b9b82b19b

Short bio:

Carl Philip was born in Starnberg, Germany. After working in a variety of startups after school, he decided to pursue further education in Barcelona. During his time at Harbour.Space, Carl had the chance to learn and work with some of the brightest people he met until now. Carl will pursue a career in Wealth Management specializing in Blockchain-related investment opportunities.

Project:

Solar

Top 5 skills:

Public Speaking

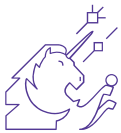
Customer Discovery

Sales

Smart Investing

Being Obsessive

One of the biggest lessons I experienced during my time at Harbour.Space was to have the confidence to be authentically myself. I used to be afraid of this exact thing for a long time. But seeing the teachers and students so authentically live their own CRAZY inspired me to do the same. I hope that others can make the same experience to authentically be their own weirdness! Because at the end of the day, none of it really matters :)



Master in High-tech Entrepreneurship

Chikara Naito

https://www.linkedin.com/in/chikaranaito/

Short bio:

Chikara was born and raised in Tokyo, Japan. In 2020, after working as a business consultant at Deloitte, he decided to pursue his dream of making people's lives a little more musical, hassle-free. That dream led him to study a MBA in High-tech Entrepreneurship, where he created withTone, a music-tech startup that innovates the experience of learning music and connects with every musician around the world. He is also known as a beatmaker named "Chikarum". While at Harbour.Space, he created a song that was adopted as the intro of Harbour.Space's podcast, "See you Tomorrow".

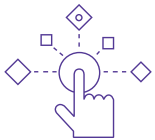
Team Management

Presenting

My decision to come to Harbour. Space was one of the smartest things I could have done in my life. If I haven't come here, I would have regretted it for the rest of my life. All lectures were very unique and valuable (and sometimes painful due to tons of assignments). Even though I am a little bit (really only a little bit) older than my classmates, I am truly grateful for the time I spent with them. I will never forget this special year. I will always have you all in my heart. I wish everyone the best of luck in their future lives. Cheers!



Master in Interaction Design

Ciarán Kelly

www.linkedin.com/in/ckell06

Short bio:

Ciarán Kelly, from Ireland, started his career as a high-school math teacher. He satisfied his itch for exploration and adventure by spending his 6-year teaching career living in and travelling around places like the Middle East and China. Now, thanks to the lessons he learned and the people he met at Harbour. Space, he has confirmed that design is the field he belongs to. All there is to do now is to keep learning, building and creating.

Project:

Portfolio

Top 5 skills:

Visual Design

Branding

Concepting

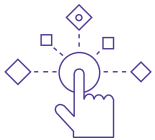
Problem-solving

I never expected this year to be nearly as interesting, exciting, difficult, educational or rewarding as it was. I've learned more in the past year than I did in the previous 30 because of how intense and engaging the classes are. For each course, the depth of your learning is only limited to how deep you can dig. Overcoming the year's challenges as a class has led to really special bonds within the group. I'm endlessly impressed by the growth that each of us achieved. In many ways, this has been the best year of my life.



Master in Interaction Design

David Petriashvili

https://www.linkedin.com/in/david-petro-22987212b/

Short bio:

David Petriashvili is a designer who specialises in user interface, user experience and digital product design. He started his career at age 15 as a designer and has worked for nearly every company in Georgia. When he was 22, he decided to relocate to Barcelona to pursue a MA in Interaction Design at Harbour.Space and meet other designers from other cultures and industry luminaries.

Project:

OneRagtime Internship

Top 5 skills:

UI Design

Product Design

UX Design

Motion Design

Critical Thinking

I was always sceptical of universities but Harbour.Space completely changed my mind. They managed to create one of the best environments I have ever been in, not only for teachers and other students but also for the staff, who were always listening and willing to help. After a challenging and intense year, I'm amazed at how much we have grown as designers and as individuals, I hope to see all as industry leaders in the future, and I wish our paths will cross again. My life and mindset were completely altered as a result of this magical journey. HS, you will always hold a special place in my heart. And to my classmates: Never stop creating beautiful things!

Master in Data Science

Dmitry Ponomarev

https://www.linkedin.com/in/demdxx/

Short bio:

Dmitry was born in the Far East of Russia, very close to China, Korea, and Japan. Before coming to Harbour. Space he worked as a Software Engineer for around ten years. During university, he studied Data Science and decided to grow and diversify his knowledge, which helped build more efficient and complex projects. At Harbour.Space, he had the opportunity to study from really experienced and intelligent people who helped him explore Data Science from different perspectives.

Project:

TrafficStars Internship

Top 5 skills:

Team Player

Software Development

Software Architecture

High-load Services

I started to study almost at the beginning of COVID, and it changed many things. Many modules were online, which was not easy, but they were very interesting. I believe the knowledge we got at the university and from friends we met during our study will help us become better.

Master in Data Science

Duc Pham

https://www.linkedin.com/in/ducpham1160/

Short bio:

Duc was born and raised in Vietnam. He graduated with a Bachelors in Logistics and Supply Chain Management, then worked in Thailand in the same industry for one year. Having had an interest in STEM subjects since primary school, he wanted to dive deeper into programming and leveraging data for business values than what his job had to offer. So Duc joined the M.Sc in Data Science at Harbour.Space to follow his passion, from which he attained a strong foundation that allowed him to break into the field. He also gained beautiful experiences from learning with world-class professors and talented classmates around the world at Harbour.Space.

Project:

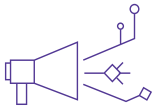
Problem-solving

It’s been a crazy year for all of us, and I’m glad to have met all of you. From this short journey, I think that what I am most grateful for are all the great friends I made. Thank you for all the blurred nights, fun memories, and crazy ideas. Remember, “Fake it till you make it”.



Master in Digital Marketing

George Silagadze

https://www.linkedin.com/in/giosilagadze/

Short bio:

George was born in Tbilisi, Georgia. Before Harbour. Space, he already had an impressive experience in Digital Marketing. However, the main reason for coming to HS was learning and gaining experience from the Digital Marketing industry leaders. During his time at Harbour.Space, George excelled his Digital Marketing skillset to the most advanced level, and now he is actively implementing that knowledge into the real world.

Project:

Photo2painting

Top 5 skills:

Search Engine Optimization

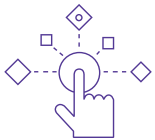
Paid Advertising

Digital Analytics

Conversion Rate Optimization

Marketing Automation

I do not think there is a better Digital Marketing programme in Europe. I already had marketing experience and a solid understanding of DM before Harbour.Space, however, what I gained here was priceless. You learn and gather experience from the best Digital Marketing practitioners in the world. It’s simply impossible to obtain this knowledge on the web.



Master in Interaction Design

Giorgi Zhuzhiashvili

https://www.linkedin.com/in/giorgi-zhuzhiashvili-a964a9149/

Short bio:

Giorgi is an Interaction and Visual Designer from Georgia. He's always been interested in the visual arts and received his bachelor's degree in Architecture and Design. As a Digital Designer, he's worked with several companies, but he's always wanted to expand his knowledge. As a result, he chose to join the Spacers to get a more exciting and enjoyable experience while also learning more about Interaction Design and Digital in general. This year has been extremely tough and stressful for him, but without stress, there is no progress - he is glad he stepped outside of his comfort zone in search of future growth, and by chance, he ended up attaining it at Harbour.Space.

Project:

Portfolio

Hansgrohe Internship

Top 5 skills:

UI Design

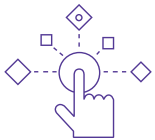
Motion Design

Interaction Design

Graphic Design

UX Design

I recall going to class on the second day of my arrival in BCN, where Irene appeared out of nowhere; it was both an incredible and ordinary experience. I recall being encouraged during an enrollment process by listening carefully to how she described Harbour.Space. Getting to know Irene, Anton, and all of these incredible teachers and speaking with them regularly have infused me with confidence that I believe there are no limits to what I can do in the future. I wouldn't trade this year for anything. It was filled with moments that I will feel proud of. I hope that more Spacers join this Purple Universe and that we will be found all over the globe.



Master in Interaction Design

Graciela Henriquez Fernandez

https://www.linkedin.com/in/iamcucusa/

Short bio:

Born in Cuba, Grace always had a natural inclination to analytical thinking and problem-solving. She studied Computer Science Engineering and has since worked with different startups, agencies and lately with big corporations as Front-end Lead Engineer. Fast forward a few years, she now focuses on front-end development, user experience, visual design, research, advising, leadership and teamwork. Grace always wanted to do a Master's degree in Interaction Design to better support her role and create the best possible experience that addresses day by day challenges at work.

Project:

Portfolio

Top 5 skills:

Front-end Development

UX Design

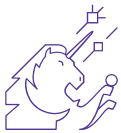
Javascript

I drive my day by day work with confidence, empathy, naturality and commitment. Over the past, I had the opportunity to work for amazing startups, small and medium sizes enterprises. I simply love to take web applications to the next level in the market, unlocking value across innovation and good design. In my spare time, you will find me travelling the world, dancing, hiding my worries with wine, living my foodie affair, meeting new amazing people and trying to capture moments that fulfil my soul. I am currently trying to learn photography (STILL).



Master in High-tech Entrepreneurship

Huwaida Ishaaq

https://www.linkedin.com/in/huwaida/

Short bio:

Huwaida is a fan of face to face meetings, gatherings and swapping stories. In 2015, she co-founded Heartwrite Co., a communications agency that uncovers and shares the untold tales behind companies, non-profits and changemakers. Before that, she worked in different industries across various sectors, from the public sector to NGOs, and in different countries.

Top 5 skills:

Storytelling

Connecting

Empowering

Planning

Project Management

From the first taste of Harbour.Space, I couldn't stop telling my family, friends and anyone who cared to listen about the exciting courses I was taking. The introduction by Kamran Elahian gave me the idea that anything is possible, that I can bravely venture into the high-tech industry despite the fact that I didn't have a 'tech' background. Max Meyer was a guest and what a superstar! This set a tone for what was to come - high calibre teachers sharing their experience, knowledge and guidance that you can use to address real business needs. An enriching experience.

Bachelor in Data Science

Jonathan Harel

https://www.linkedin.com/in/jonathan-harel/

Short bio:

Jonathan Harel was born in the United States but came to Spain from Israel, where he had spent most of his life. He is a tech enthusiast and an 8200 alumni, the IDF's elite technological unit. Jonathan came to Harbour.Space looking for a better learning experience and interest in exploring a different way of life. Here, he dove deeper into the fields of Computer Science, algorithms, and Data Science. Down the road, he plans to use his personal and professional skills to leave a positive mark in this world.

Project:

OJOS

Top 5 skills:

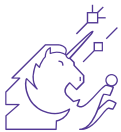
Rapid Prototyping

Creativity

These three years in Barcelona were life-changing for me. I learned a lot about myself; I changed, self-developed, and grew so much, all thanks to this place and the people. The city and each of the friends I made here gave me something that helped me become a better version of myself. I am eternally grateful for this journey and can't wait to meet all of you again in the future. Keep creating, keep smiling, keep living!



Master in High-tech Entrepreneurship

Juan Alcaraz

https://www.linkedin.com/in/juan-alcaraz-0a197a138/

Short bio:

Juan was born in Madrid and studied all over the world, including London, Moscow and Lisbon; his passion for languages keeps moving him around new places. He came to Harbour.Space to develop his idea, Nova Connect, managing to launch it and get his first customers. He organized the Harbour.Space football team, scheduling matches and uniting everyone through the sport. Now, he wants to dedicate his full time to Nova Connect and make it grow by exploring new markets.

Project:

Nova Connect

Top 5 skills:

Management

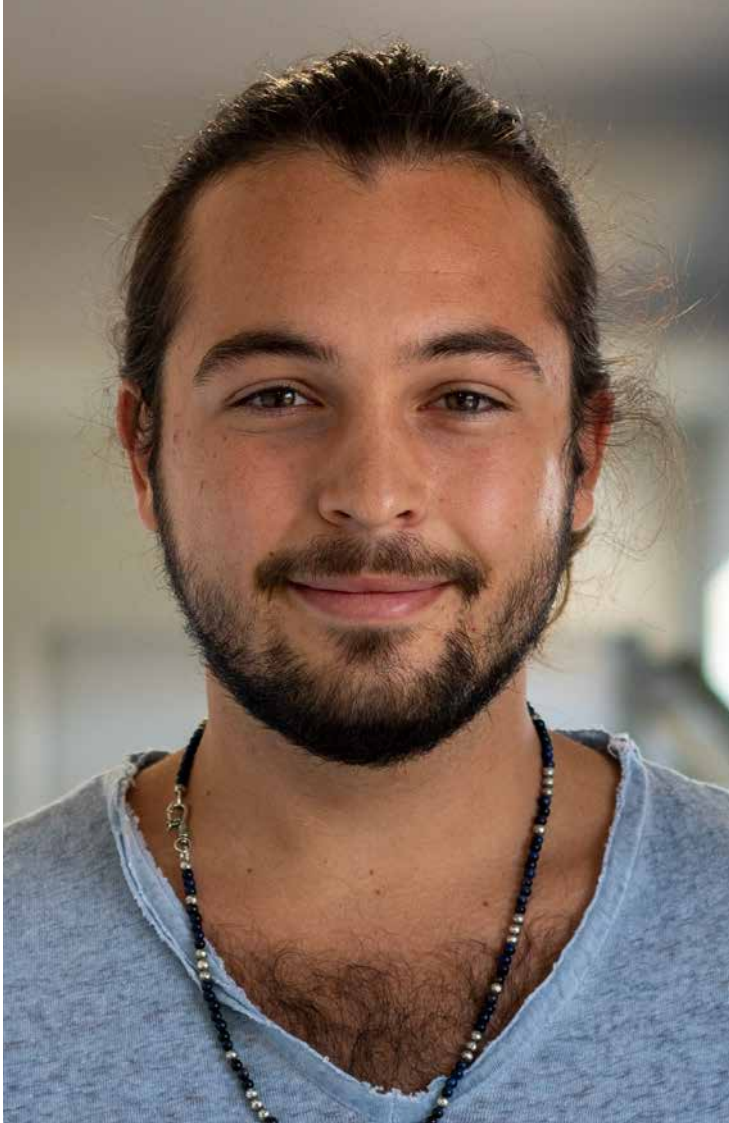
Fast Prototyping

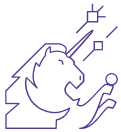
Polyglot

Strategic Thinking

Creative Problem-solving

It’s been an incredible year, but intense and too short. We’ve made amazing friendships and grown not only our startups but also ourselves as individuals. I’ve always said this about Harbour.Space, you can like or dislike some modules or concepts more than others, but the human capital in this university is absolutely priceless. I’m very lucky to have been able to meet all these amazing people and build such strong friendships in a year time. Therefore I would like to thank everyone I’ve met this year and wish them the best of luck with their projects, y un gran abrazo a mis amigos los ángeles azules! Love life, and much love!





Master in High-tech Entrepreneurship

Julian Paul

https://www.linkedin.com/in/julian-paul/

Short bio:

Julian Paul is a Bermudian born Austrian with a background in Sound Engineering, Business Development and finally, High-tech Entrepreneurship. Before his time at Harbour.Space, Julian launched VENTRY (an accelerator) and AgeOfUs (a team development consultancy). Now, he has found his niche in prototyping micro products fast, launching an MVP for a product idea he had almost every two weeks. After Harbour.Space, Julian will be doubling down on what works for him to found Vienna's finest product studio.

Project:

CREATORLIST

Top 5 skills:

Product

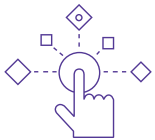
Branding

Growth Mindset

Rapid Prototyping

No-Code

Harbour.Space has been a rollercoaster. Filled with highs of successfully reaching product roadmap milestones and lows of COVID injected uncertainty and more. But, I would like to leave my master's programme having gained the confidence in my practical ability to execute things at the highest level, which was something I needed to acquire through building products that were important to me. On that note, I would like to encourage anyone who wants to be an entrepreneur to ask themselves a simple question: am I a doer? If the answer is no, rethink if this is the right thing for you. Ideas are cheap, and execution is everything.



Master in Interaction Design

Kunal Belamkar

https://es.linkedin.com/in/kunalbelamkar

Short bio:

Kunal is from Pune, a city in India where he studied his Bachelor's in Computer Science. During his studies, he discovered the world of design and took a deeper dive. After graduation, he joined Harbour.Space University to study a Master's in Interaction Design, giving him the skills and abilities to make people's life's easier and thereby making the world a better place. He had the opportunity to work with various industry leaders and gained knowledge from them. He specialises now in various projects related explicitly to branding and visual design.

Project:

Portfolio

Top 5 skills:

Visual Design

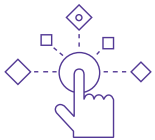
Branding

Motion Design

User Experience

Front-end Development

I loved my time at Harbour.Space and will cherish all the memories, including last-minute presentations, Friday Mongollon's Pizza and Epic Friday night outs! I've always been the fun guy, and I continue to be. Looking for the king of hacks? Call Kunal. Over the span of a year, I've been a great student, teacher, doctor, comedian and above all, I'll miss the compulsive squad, gossip girls and sons of beaches. Hope to see all of you during the next reunion. OMG, Let's go! Peace.



Master in Interaction Design

Margherita Giottoli

https://www.linkedin.com/in/margherita-giottoli/

Short bio:

Margherita was born in Perugia, Italy, in 1996. There, she studied Web and Interaction Design, as design has always been her first passion. Her desire to travel and eagerness to learn led her first to London, where she lived for one year and then to Barcelona, where she completed her Master's in Interaction Design. She enjoyed the opportunity to discover different design disciplines that she had never explored before, as well as meet brilliant professors and students at Harbour. Space. Looking towards the future, Margherita plans to move to Amsterdam to start her first job as Junior Designer.

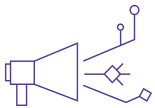
Curiosity

This year has been challenging, but it has also been one of the best of my life. I grew as a designer and as a person. I'll remember the friendships I made, the memorable moments, and learning not to give up. Harbour.Space is an amazing place. I'm grateful for all my inspiring classmates, you were the highlight of my year, and I can't wait to see the cool things you'll all work on. I hope our paths cross again. Harbour.Space and all the Spacers will be forever in my heart.



Bachelor in Digital Marketing

Mathilda Bäckström

https://www.linkedin.com/in/mathildabäckström1997/

Short bio:

Mathilda is originally from Sweden and came to Barcelona to do her Bachelors's degree in Digital Marketing after working as a visual merchandiser for Zara in Stockholm. In the three years of the bachelor's degree programme, Mathilda learned everything from marketing, business, technical skills, and design while simultaneously working on several internships such as Singa, Sahara Silver, and Manso's Café. She now plans to do one semester at Harbour.Space@ UTCC to be ready to move to Stockholm for an MBA in Management.

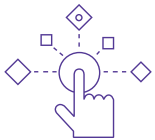
I can’t stress enough how amazing it has been to meet so many intelligent students and teachers from so many countries, and I’m so grateful for the opportunity to make friends for life in the process. Apart from this, my personal development during these three years has been life-changing. I’ve learned to collaborate with diverse skill sets and tackle every challenge along the way. It’s been incredible to work with people who shared my motivations and goals, and I hope to collaborate more in the future.



Master in Interaction Design

Mayra Sánchez

https://www.linkedin.com/in/mayra-j-sanchez-lara/

Short bio:

Mayra is a young creative from Mexico, where she completed a BA in Digital Arts and gained some field experience. Still hungry for more, she travelled across the world to Barcelona and pursued the Interaction Design Masters, where she learned how to apply her skills and knowledge to generate change. She is now on the look for the next challenge to pursue a career as an Experience Designer.

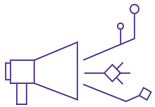
This university definitely got me out of my comfort zone and challenged me so hard. Actually, it still challenges me. So, for example, I will continue my homework after finishing this quote. But this is the thing that made this year one of the most productive years of my life. I made good friends, lived unforgettable memories, and got lots of experiences, and I am very grateful for all of these.



Master in Digital Marketing

Napassorn Ittiprasert

https://www.linkedin.com/in/napassorn-ittiprasert-6650aa152/

Short bio:

People-person Napassorn, a.k.a. Pina, has a passion for psychology and behavioural economics. She's in the process of becoming a digital marketer, and hopes to use her skills to raise the profiles of local products which she finds are high-quality and unique. It is a sort of cultural mission to preserve and improve upon local products by marketing them to the world. Being a nature and bird-lover, Pina has taught herself to mimic bird sounds. So, if you leave her a good word when you enjoy any of her work, she might literally tweet back in appreciation

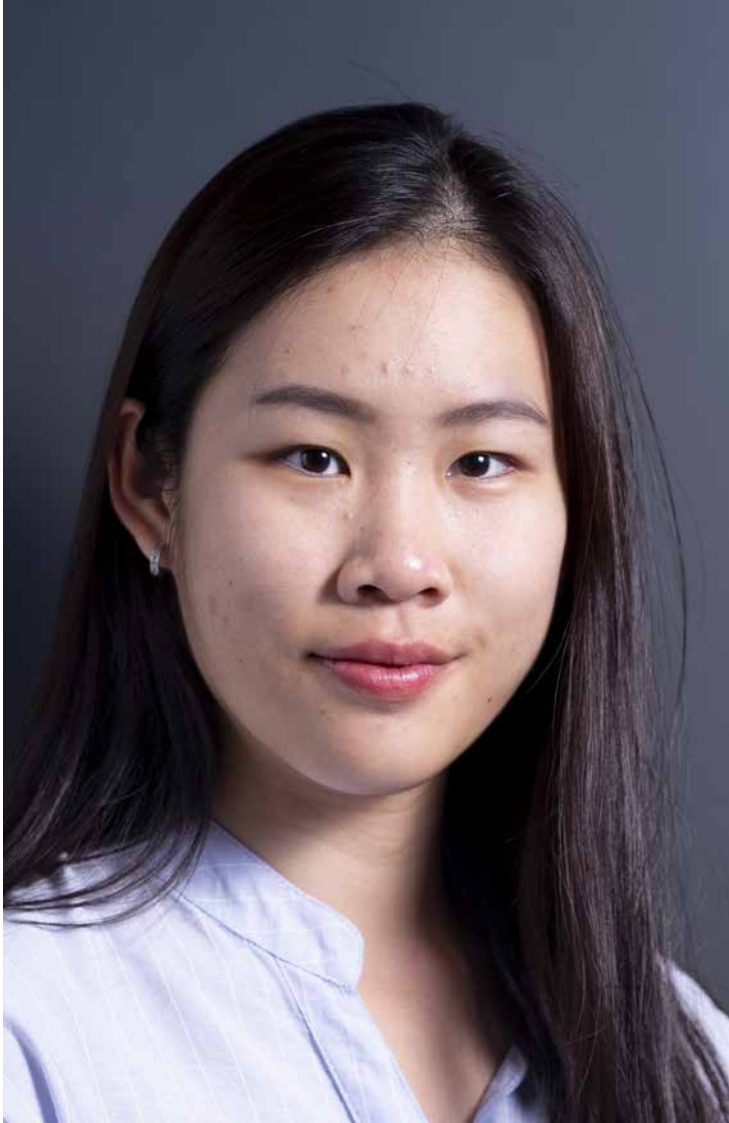
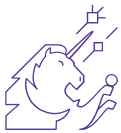
There are three main positives with the Zero to Hero module. (1) The programme requires me to have an aggressive progression day by day. That is a good thing because there is less time thinking in the room leading us to get more feedback from the users. (2) the classmates are amazing, open-minded and helpful. And (3) the teacher is not simply an academic professional. Kamran has a strong background and a wonderful mindset, so I learned much more than I expected.





Master in High-tech Entrepreneurship

Navanat Mahankasuvan

https://www.linkedin.com/in/navanat/

Short bio:

An industrial engineer who loves business and marketing, Navanat has the passion to see his ideas through. Coming from a small town in Thailand and moving to the big city of Bangkok as a youth, Navanat understood that there was a big gap in education and opportunities between cities and further-flung areas. He is up for any discussion that leads to reducing inequality in the world. A self-proclaimed part-time traveller, Navanat believes that, in their own ways, everyone can help others to have better lives.

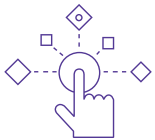
I am personally concerned about how to survive in this fast-changing world. Knowledge and execution are very important, but knowledge can quickly become obsolete. I used to be interested in MBA programmes in established universities, but I think the traditional classroom is not relevant in today's world. The High-tech Entrepreneurship programme at Harbour.Space provides a fresh learning process and an opportunity to collaborate with eager students and teachers. It's a brilliant study concept - learning by doing.



Bachelor in High-tech Entrepreneurship

Nazareno Clemente

www.linkedin.com/in/nazareno.clemente

Short bio:

Naza was born and raised in Monte Grande, Argentina, a small-town South of Buenos Aires. He moved to Belo Horizonte, Brazil, for his teenage years and landed in Barcelona, Spain, to study High-tech Entrepreneurship and Digital Marketing at Harbour. Space. He came to Harbour.Space to learn about entrepreneurship and marketing and ended up learning about hundreds if not thousands of different topics, trends, case studies, research papers, and much more. Plus, he met incredible people every step of the way.

This year has been nothing but great. Even with the pandemic, it has not been a barrier for us to learn and grow ourselves. There have been times when things are overwhelming, but everything was worth it. I may not have been able to meet my classmates and lecturers personally, but I am grateful for the learnings and experiences they have imparted me. I am hoping to see you all in the future and all the best in our future endeavours.

Master in Data Science

Pierre Schwob

https://www.linkedin.com/in/pierre-schwob-b8337362/

Short bio:

Born and educated in France as an engineer, Pierre was also fascinated by China's culture, and he spent the last 10 years in Asia to pursue business opportunities. Over the years, he got convinced that Machine Learning would soon deeply modify our society and that it could have a similar impact in the near future as Internet had in the previous 20 years. Luckily, Harbour.Space offered him exactly what he was looking for: an education environment that was adapted to our rapidly changing economy, with a focus on new technologies and start-ups.

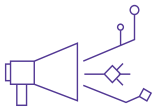
Studying such a complicated and technical field as Machine Learning can be daunting at times, this stuff is not easy! Big thanks to all our teachers to have been so helpful and so enthusiastic about the amazing things they were talking about. And congrats to my fellow classmates: because we had so many different backgrounds and expertise, there was always one of us that could help others when facing difficulties. Now it is time for us to apply what we learned, but also to remember that old Chinese proverb: "Learning is like the horizon, there is no limit."



Master in Digital Marketing

Pichanan Wichitchayanon

https://www.linkedin.com/in/jang-pichanan/

Short bio:

To Pichanan, marketing has an unequivocal charm. She is part of the Siam Cement Group (SCG) where, over the past six years, she has moved through several departments from Marcomms to Digital Business and Export. Being at Harbour.Space opened Pichanan up to a new area of passion - that of digital technology. Not only will she find ways to apply newly found tech tools at work, but she'll mix things up in her other areas of interest as well, namely fashion design, online advertising and cats.

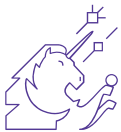
It was a great opportunity to attend Harbour.Space. I had a wonderful experience and meaningful time getting to know new people and building good relationships. I have made many interesting and great friends with my classmates. People are very open to sharing their knowledge and perspectives. The lecturers are really fantastic. Every class was lively and interesting.



Master in Digital Marketing

Sakura Shida

https://www.linkedin.com/in/shida-sakura-297887103/

Short bio:

After graduating from the Bangkok University International in 2017, this Japanese-Cambodian designer started a fashion line that aims to decrease fashion and plastic waste. In 2018, Sakura co-founded Bread Design & Media collaborating with other start-ups to produce design and media products for SMEs, global brands and government agencies. Their goal is to support young and passionate creative students to gain work experience with real clients. Sakura likes to link arms with fellow entrepreneurs, especially those who are new to the arena. She is involved with the Women in Tek Network, a programme organised by The Asia Foundation. She is currently writing a book both to "share the experience (of being an entrepreneur) and as a reminder to self"

Possibility, creating, collaboration and reality. These are the words that first come to mind when I think of what the Harbour.Space experience has been for me so far. I was able to immerse myself in this new environment; where I got to meet many people from different backgrounds and cultures, learn new concepts and ideas. The overall experience helps students envision new possibilities, new creations in reality, as well as collaborating with others. Because of Harbour.Space, I believe I can reach my full potential and discover valuable new insights.

Master in Data Science

Sarah Hasan

https://www.linkedin.com/in/sarah-hasan-419202197/

Short bio:

Sarah Hasan was born in Syria. After graduating from Software Engineering, she worked on many customer relationship management projects at a telecommunication company. After, she moved to Moscow to join a Russian company as a Marketing Growth Analyst. Sarah wanted not only to use machine learning but also learn all the math, details and tricks behind it. That is what Harbour.Space's Data Science Master helped her with through teachers with vast experience from both industries and academic backgrounds. She is working now on an AI application to help international students by applying all the skills she obtained from Harbour.Space, and now will continue her PhD degree.

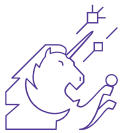
I faced the challenges of unexpectedly switching to online classes throughout the year due to the COVID-19 pandemic. Although, the professors and TAs are deployed with study materials, communication tools and technical support, I figured out that I can obtain good outcomes and make new connections from different countries. Studying at Harbour. Space is the first step of my UX/UI designer journey.



Master in High-tech Entrepreneurship

Shilov Vasily

https://www.linkedin.com/in/vasily-shilov-520651201/

Short bio:

Shilov Vasily was born in the Russian Federation. He got his degree in Moscow, specialising in "Politics and Law", and began working for international companies like "Clarins" as an HR assistant and "Meridian & Partners" as an assistant of a lawyer. During this journey, Vasily realised that doing business and developing ideas that solve humanity's problems is his vocation—applying to Harbour.Space Master's programme in High-tech Entrepreneurship opened new opportunities for building a network of colleagues and mentors working in the sphere. All this pushed Vasily to develop his own start-up, "DigiBacked" - a digital assets insurance company.

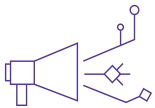
I am very grateful for the close relationships we built as a class over the past year. The support we've had for each other certainly helped us grow and find opportunities that we were excited about. I was told that we were the most tight-knit batch, yet that sounds surprisingly unsurprising. I wish for every year to experience this level of complicity.



Bachelor in Digital Marketing

Yesha Mehta

https://www.linkedin.com/in/yeshajmehta/

Short bio:

She is the boss lady, or at least that's how some describe her. She was born and raised in India, Mumbai. She believes people learn in different ways, and for her, it was by inspiring stories. When she was little, she used to collect ads, and that's when she got a kick in her brain to go to different places and see how the same message would impact differently to other people around her. So when she realised that, she searched and found Harbour. Space, a new chapter in her life. She is now graduating with a BA in Digital Marketing and specialises in Social Media. She understands people, loves telling stories, and is a catalyst for change. At Harbour.Space, she learned Social Media, Content Creation, SEO, Brand Strategy and ran some pretty awesome campaigns.

“Quality and Innovation for music learning.” withTone is a social learning music platform. The main problem of learning music is the very outdated style. Therefore, most people need to be patient through the process of learning or even teaching music. We, withTone, allows everyone to ask any questions by video and get valuable feedback from other music players.

Portfolio

Sherly – Tanyabhorn Kornwattananon

Project description:

Tanyabhorn's portfolio website presents UX/UI journeys as an ongoing digital playground and shares all kinds of cool stuff and experiments with storytelling. I made it with Readymag because of the variety of features, easily adjustable with devices interface and customizable grids and layouts. My portfolio consists of 4 main navigations: landing pages (TANYA), Works, About, and Leisure. As a personal brand, I start with an introduction by using my images, name, and tagline to make a memorable first impression on the landing page. Next, I present my background and experiences in a more detailed About section that encompasses who am I, what I do, and what perspective I bring to work. For the Works section, four selected case studies are brought up to show the process from start to finish: the challenge, problem statement, how I approached it, what I did to discover, design, and test solutions, and what I learned along the way. Finally, the Leisure page is an additional page for sharing my UX, UI, and animation experiments.

Evaluating and Improving the Turtle Trading Method using Machine Learning

Duc Pham

Project description:

The Turtle Trading method results from a debate between a legendary commodity trader and his friend: Richard Dennis and William Eckhardt. Dennis strongly believed that anyone could be taught to become great traders, while Eckhardt countered that success comes from Dennis's innate talent. The result of that debate is a trading method from Dennis, which can be followed like a heuristic - every action depends on price movements, no human judgement is involved in the process. In this thesis, I attempted to evaluate whether the method is profitable in the Vietnamese stock market and improve profitability using machine learning.

Internship at Open Development Cambodia

Tey Sovannratanak

Project description:

I joined this internship program from 15 March until 15 August 2021 as a communication and marketing intern at Open Development Cambodia, an international NGO that mainly focuses on improving the spread and usage of open data within the country.

Some of my main tasks were social media management, including preparing strategies to reach the marketing goals with detailed tactics. I also designed visualized posters that fitted best with the marketing campaigns. During events, physically and remotely, I was in charge of shooting and editing photos and videos. Lastly, researched and drafted the first social media guideline and branding guideline for the organization.

Leagues of Code

Alex-Gabriel Simion

Project description:

Leagues of Code is an online coding academy teaching young students coding and computer science by providing top-notch lessons taught by world-class industry leaders to bright young pupils. Students learn more than mathand coding; they acquire problem-solving skills, enhance academic performance, discover new ways to view tech and create their own path in the field.

My role in this project was to implement and deliver relevant featuresfor building a centralized platform where students and teachers can interact through courses, contests, and other activities.

MySwissBot
Hi! Welcome to MySwissBot.
I am so excited that you want to study in Switzerland!
What questions do you have for me?
How much Does it Cost to Study in Switzerland?
Tuition fees at most Swiss universities are between 500CHF and 2000CHF per semester for the majority of academic programs. In addition, you will need to budget for cost of living. You can expect to pay around an average of 2,000CHF for monthly living expenses.

TrafficStars Internship

Dmitry Ponomarev

Project description:

TrafficStars was built by a team of experts with over 15 years of experience in the Online Advertising Industry. The company has grown and evolved over the years to develop leading technology, and we now deliver over 4 billion ad impressions daily. TrafficStars has become a second home for over 50 staff members based in offices across Cyprus, Spain, and Canada. During my internship, I took the trouble to create a service to optimize ad traffic defined from the user advertisement strategy. Users can define the rules to block or activate some traffic sources by conditions to optimize the conversion and the budget. The second internal project was a recommendation service for creating prepared advertisement companies based on user perforations from exists list of campaigns of the user. The module automatically analyzes user companies and suggests basic configurations for the new one, including auditory and advertisement sources to maximize company income.

Well Well Well

Pierre Schwob | Adel SaadEddin | Mazen Hassani

Project description:

800 million people in the world don't have access to clean water today. Some communities try to drill water wells, but they need help to know the best potential location before they start drilling. Why not use a little bit of AI to help them out?

We propose a 2 part solution to this problem:

- The first module is a free web application that takes a single input, the GPS location of any point in the world. This web application will then predict the best places to drill a water well within walking distance.

- The second module is for people who don't have access to a mobile phone. A cheap portable device (cost under 10 USD), that will store some precomputed ideal locations for wells all around the world and guide the user to the nearest place to drill a water well.

https://www.youtube.com/watch?v=CnvxaTBWoZo
