

HARBOUR SPACE
UNIVERSITY

**GRADUATING
CLASS 2023**

We are sending our graduates out into the world with a bang. As they move on to the next chapter of their lives, we will be looking forward to their upcoming adventures as they reshape the world.

This year, the graduating students are from the bachelor's and master's programmes in the departments of Front-end Development, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Data Science, Cyber Security, Product Management, and Computer Science.

In this booklet, you will find information about our graduating students and their experiences of studying at Harbour.Space University. You can also find details about the main projects they are pitching to the investors during the Demo Day.

During this past year, our students have worked hard and gained experiences that allowed them to achieve substantial growth in both technical and social skills in the newly emerging fields of today. In the future, we will be looking forward to seeing them prosper in their careers!

We have created a pamphlet as a look back on your educational journey that you braved alongside us, and we hope that when you look through it, you'll remember all the great things you've accomplished during your time in Barcelona. We certainly will!

We believe careers should be fulfilling, exciting, and meaningful. We exist to make this happen. Attending university is as much about finding your feet in the world and discovering your own drive and passion as it is about acquiring skills, knowledge and experience.

From day one at Harbour.Space, your prospective career takes centre stage and we facilitate your development and your networking and create opportunities to help you take charge of your future. What comes after Harbour.Space? The sky is the limit. Don't be shy, reach for the stars.

Svetlana Velikanova
Harbour.Space University
Co-Founder & CEO

HARBOUR SPACE

UNIVERSITY

About Harbour.Space University

Harbour.Space is a university created by entrepreneurs for entrepreneurs. We focus on meeting the demands of the future, while traditional education providers are too often stuck in the past.

We're one of the only European institutions completely dedicated to technology, design and entrepreneurship, and our interdisciplinary courses are taught by some of today's leading professionals. Our aim is not only to equip students with the knowledge to take on the real world, but to nurture, create and shape tomorrow's tech superstars.

Key Facts

- Founded in 2015.
- Offers degrees in Mathematics, Computer Science, Data Science, Cyber Security, Fintech, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Product Management, Front-end Development, and Digital Transformation.
- Faculty comprised of the most accomplished professionals and industry leaders from around the world, who continuously scrutinise the curriculum to ensure students focus on realtime useful subjects.
- On our state-of-the-art campus knowledge flows freely.

TIME ≠ MONEY

Youth is not for sale. That's why we teach highly relevant and real-world responsive courses that give students a head-start even before graduation. Our programme leaders continuously scrutinise the curriculum to ensure students focus on realtime useful subjects. We teach 3-week intensive courses throughout the year, offering more learning in less time, on flexible and adaptable schedules.

STUDENTS ARE SUPERSTARS

Harbour.Space exists for one purpose only: to help young individuals pursue knowledge, so they can progress into fulfilling and meaningful professional futures. We offer the fundamental knowledge, skills and guidance that give students the chance to make anything happen. Our students are not cogs in a machine. We celebrate our human approach by cultivating team work, interdisciplinarity, empathy and curiosity.

NO COMPROMISES

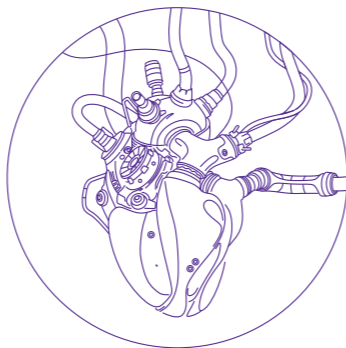

If you get a place at Harbour.Space, you get the best education. The programmes are tough and our students must work hard. We don't sell quick-fix coding or data science courses, because they don't exist. Only with very solid foundational knowledge of universal core concepts in science can students grow to move forward indefinitely, no matter how much the world around us changes.

UNIVERSITY REINVENTED

Leaders in business are the students' personal teachers. We don't care about titles and we don't do red tape: we hire teachers based on experience and expertise, just like in the real world. We are the most relevant university of our age.

TECH ♥ DESIGN

Great ideas and their realisation seldom come from specialists: they come from all-round visionaries. But presently, technology and design are in an arranged marriage: they are together because this is what's expected. We are cultivating a love marriage between the two, and we are the only university in Europe to do so. We're doing this because the two naturally depend on one another, but experience a great lack of understanding. Interdisciplinarity is our love potion – expect sparks.

Akshay (Ash) Khairmode

<https://www.linkedin.com/in/akshay-khairmode-b33a30160/>

Quote

This has been a wonderful year, so different from my normal. I feel like I learnt so much from all the different cultures and loved to share mine with all the bonds I've made here. This experience, meeting such creative people, has influenced and made me a better designer. Gracias

Bio

Akshay was born in Pune, India. After completing his Computer Engineering degree, he decided to shift gears and pursue a career in Product Design. After working for a couple of years, he felt like there was yet more to learn and see in the world. He heard about the ID programme in Harbour.Space and the professors coming to teach there. It was an easy choice to make then.

I want to congratulate my colleagues and wish them great success! All the people with whom I communicated in Harbour.Space are always stored in my mind and heart. At any time, I'll be happy to be in touch with them.

Bio

Aleksandra was born in St. Petersburg, Russia. She got a bachelor's degree in applied mathematics and programming. Then Aleksandra tried to apply her skills in the economic domain at NES, in pure maths at IMU, and eventually found her genuine interest in Data Science at Harbour.Space University, where she got an understanding of modern data science, met numerous outstanding people, adjusted her soft and hard skills and understood the main direction in terms of career and self-development. She plans to dive deeper into data science from both theoretical and practical points of view, focusing on generative neural networks.

An incredibly intense and transformative year-long journey filled with learning, growth, and discovery!

Bio

Born in Russia, Alexander initially pursued a degree in Electrical Engineering before transitioning into digital marketing with a focus on SEO. His educational journey led him to Harbour.Space, where he further developed his skills and broadened his industry perspective. With this enriched knowledge and experience, Alexander now sets his sights on Spain, aiming to establish a high-tech business.

André Cesário Pereira Werner

<https://www.linkedin.com/in/andre-cesario-pereira-werner/>

Quote

I could say these were the best three years of my life so far, while I hope this will soon get outdated as I feel life has only gotten better over time. The downside of being away from my family was somewhat obfuscated by the amazing friends and experiences I had during this incredible phase I went through.

Bio

André was born in Itajaí - SC, Brazil. After graduating in Business Administration, he went back to his city to work with his family in the automotive business where he worked for four years, the last three as Sales Manager of a Volkswagen Dealership. Without ever seeing a line of code, he decided to join Harbour.Space to pursue a master's in Data Science. After three years of studying Programming and Maths foundation, Machine Learning applications, along with Marketing and Entrepreneurship classes, he feels like he has a new view and set of tools to deal with the new world we live in.

Harbour.Space expanded my horizons and gifted me lifelong friends from around the world. It made me a more responsible person. Grateful for the incredible global experience!

Bio

Anier comes from Cuba, where he kindled his passion for algorithms through high school programming competitions. With a keen interest in ICPC and a dream of studying abroad, he joined Harbour.Space. Here, he found his love for Machine Learning. Embracing the multicultural environment, he formed lasting friendships and cherished the invaluable global experience. Anier envisions working for a few years before embarking on a rewarding graduate studies journey to further his intellectual growth.

This year was game-changing! Although it was the first time I lived and studied far away from home, I had a fantastic opportunity to meet people from all over the world. It expanded my mindset, network, and potential, and I couldn't be more grateful to Harbour. Space University!

Bio

Arina was born in Moscow, Russia. In the second year of her Bachelor's degree in Journalism, she realised that her passion had led to Marketing. By the time she graduated, she'd already got experience in different industry fields as a Marketing Manager. By choosing her Master's degree in Product Management, she aimed to expand her potential and realised it was the right choice after the second module.

This year showed me that design indeed is my passion. Relate studio was born during my studies at HS and the whole period is quite memorable.

Bio

Arseniy started his bachelor's in journalism, primarily focusing on humanities. Shortly after graduation, Arseniy applied for another bachelor's programme at the Higher School of Economics Design Department. His desire to further specialise in Graphic Design led him to apply for Interaction Design at Harbour.Space. This was the period when he was actively involved in his ambitious startup – "Relate" Design studio. Harbour.Space indeed helped Arseniy acquire significant hard skills and foster new relationships. He is looking forward to working with Harbour.Space students and alumni in the future.

Ernesto Peña

<https://www.linkedin.com/in/ernestodavidph>

Quote

My year at Harbour.Space was a whirlwind of learning and growth. Each module was a sprint, challenging me to rapidly acquire new skills. I was lucky to share this journey with inspiring classmates and top-notch teachers who constantly pushed the envelope of tech innovation. Here's to a remarkable journey in an incredible city!

Bio

Ernesto, originally from Cuba, is a Computer Science graduate with a strong background in programming competitions like IOI and ICPC. He selected Harbour.Space for his further studies, drawn to its dynamic atmosphere and the opportunity to expand his technical skill set. At Harbour.Space, Ernesto not only deepened his understanding of Computer Science, but also interacted with students from diverse nationalities and backgrounds, enriching his world view. Looking ahead, Ernesto aims to apply the skills and experiences gained at Harbour.Space to excel professionally in the tech industry.

Fares Al Khouli

<https://www.linkedin.com/in/fares-al-khouli-5a7b371ab/>

Quote

These past three years at Harbour.Space have really shaped who I am as a person today. I came here hoping to leave college with a plan. I can comfortably say that through the years of hard work, endless help from classmates and professors, I am more than ready for what lies ahead. Nothing means more than the friendships I've made along the way, and I can confidently say coming here was one of the best decisions I've ever made.

Bio

Fares was born and raised in Damascus, Syria. After finishing high school, he realised he had a curiosity about the tech space and was eager to explore it. One semester into his computer science studies, however, was all it took for him to realise he was more interested in the business side of things. That is what led to constant research into degrees that could offer what he was looking for and how he ultimately learnt about the High-tech Entrepreneurship programme at Harbour Space. That summer, he applied to the HTE bachelor's programme, and has been hooked ever since he was asked to present a capstone idea during the application process. Fast forward three years and his main focus is making that capstone project a reality.

Filipp Skatershchikov

<https://www.linkedin.com/in/philipp-skaterschikov-4071b1ba>

Quote

That was an amazing journey, that made a transition to a whole new country and culture seamless and exciting. I got to meet so many talented, motivated and like-minded people as well as got to expand my network drastically. The opportunities HS provides in terms of working hand in hand with incredibly experienced mentors and teachers in- and outside of the class (see Andorra Ski trip) are simply remarkable and make you want to comeback for more!

Bio

Filipp was born and raised in Moscow, Russia. After doing his Bachelor in World Economy at the prestigious Higher School of Economics, Filipp sought opportunities to narrow down his field of knowledge and was a pioneer of a completely new Product Management Master's Programme and became patient zero. A year and a half later, he now has a much clearer picture of where and how he should kickstart his career and is already applying acquired skills in several startups. Filipp doesn't stop and is going to continue his studies by doing another Master's in Sports Management to narrow down his expertise even more and link it with his major passion.

Fortune Max-Eguakun

<https://www.linkedin.com/in/fortune-max-eguakun/>

Quote

I think the world could always use a bit more individuality. Being yourself gives others the courage to be themselves as well. We should strive to always be authentic versions of ourselves. If you plan on making a change, it is the first thing you should start with.

Bio

Fortune started programming at age 14, making games for friends and has been programming ever since. Originally from Nigeria, he got his bachelor's degree in Engineering mostly because he feared traditional educational systems might ruin his love for coding, all the while independently honing his programming skills. Harbour.Space's avant-garde approach to education made him reconsider and take a chance, and he came away very pleased with the results. The close-knit community and the seasoned experts who come to teach are his highlights. He hopes to one day be able to put a dent in the net suffering of humanity.

Juan Chozas Sumbera

<https://www.linkedin.com/in/juan-chozas-sumbera-a491a2185>

Quote

I want to give special thanks to Svetlana and all the staff that make this university. I feel grateful for the possibility to learn from such a varied selection of teachers, and even more so for the eye-opening cultural diversity that this university has achieved.

Bio

Spanish, born in Madrid, Juan graduated in Computer Science from Universidad Complutense. Pursuing a master's strictly focused on front-end development led him to Harbour.Space. Impressed by the aligning modules, he found the teachers' backgrounds and unique personalities impactful. Each instructor's distinct philosophy enriched his exploration of modern web development. Looking ahead, Juan aims to collaborate with skilled designers to implement the captivating details that set projects apart from the rest: immersive experiences, concise interactions, and mesmerising 3D elements.

The friendly interactions amongst peers and teachers in this community have impressed me. One of the highlights of my time here was the chance to acquire practical skills from field experts.

Bio

Chi is from Vietnam and has two years of experience in a Digital Product team after completing her Bachelor's Degree. During this time, she developed a passion for designing user-friendly products. She earned her Master's in Interaction Design from Harbour.Space, where she explored various design disciplines and deepened her understanding of Product Growth. Now equipped with valuable knowledge, Chi is determined to create digital products.

Life's challenges shape us. Embrace them rather than regret missed opportunities. What doesn't kill us makes us stronger. Each stumble a chance to grow. Keep moving, for regret lasts longer than any struggle. Our journeys define us.

Bio

Kultida Bhumina, nicknamed Mint, from Thailand, graduated in Accounting from Thammasat University and worked for five years as an external auditor. She then won a scholarship to study Data Science at Harbour.Space University. The shift was challenging, but support from colleagues, friends, and professors helped her thrive. Now, eager to return to her company and apply her newfound data science skills, Mint is ready for the exciting challenges that lie ahead.

Maksim Zadorozhnyi

<https://www.linkedin.com/in/maksim-zadorozhnyi-277409244/>

Quote

This year has been full of excitement for me. It was an acquaintance with Spain, with Barcelona, and with the most interesting university community. I also got acquainted with areas that I had not touched before, with advanced algorithms and the world of competitive programming, with mobile development, got practice in devops, worked with cloud technologies. Besides that, I met a lot of good people in Harbour.Space.

Bio

Maksim was born in Russia. In 2011 he graduated with a bachelor's degree in Physics at Saint Petersburg State University. After that, Maxim tried teaching himself mathematics and robotics. Gradually, his interests shifted to the field of software development. In the summer of 2022, Maxim decides to revive the old and becomes a student again. After graduating from Harbour.Space University, he plans to dive deeper into software development and solve more complex problems using a modern technology stack.

I spent an incredible 3 years at university. This place changed me a lot; I became more responsible, experienced, and social. Although I'm graduating already, I hope to keep in touch with all the amazing people I've met here.

Bio

Maksym was born and raised in Kharkiv, Ukraine. After graduating from high school, he enrolled in a Bachelor's degree in Computer Science at Harbour.Space to develop both his hard and soft skills. During his studies at the university, Maksym dedicated a lot of time to studying not only Computer Science but also getting to know other programmes, including Fintech, Product Management, and Data Science. Apart from learning, he put his knowledge into practice by working as a software engineer and taking part in various programming-oriented projects organised by Harbour.Space. After graduation, he plans to continue his journey as a software engineer.

Quote

Enrolling at Harbour.Space University has given me the incredible chance to completely transform my life as I make the move to vibrant Barcelona! This new chapter opens up a world of fascinating learning opportunities and the potential for exciting paths ahead. Here's to embracing the wonders of education and stepping into a future filled with endless possibilities!

Bio

Born in Cuba, Mariano finished a Bachelor's degree in computer science. Encouraged by supportive friends who illuminated his path, he ventured into the Moscow Competitive Programming World Final. This experience acted as a catalyst, propelling Mariano to join Harbour.Space University for a Master's programme in Computer Science. Fuelled by a strong desire to learn under skilled professors, the modules not only impart knowledge but also offer fresh perspectives. This academic pursuit provides an opportunity to fine-tune expertise while benefiting from the guidance of accomplished mentors.

Harbour.Space prepared me for my work in ways I never expected. It's like having a toolbox filled with design, tech, and business skills. I can create engaging content, teach art, and think creatively, thanks to this amazing journey! Come and join our community in Barcelona, I'll show you the best coffee in town!

Bio

Maria Sredina, a versatile designer, began her creative journey at an early age, exploring various art forms. Her educational path led her through interior design, clothing modeling, and advanced art courses. Maria's skills span real-life and digital art, marketing, branding, and more. She also shared her expertise as an art teacher. Discovering Harbour.Space University during a 2019 Tech Scouts camp, Maria was drawn to the passionate community and chose it for her bachelor's in Interaction Design, along with minors in Digital Marketing and High-tech Entrepreneurship. Her commitment to creativity finds its perfect outlet at Harbour.Space.

Md Abuzar

<https://www.linkedin.com/in/md-abuzar-90552011b>

Quote

This year has been a mix of happiness, stress, learning and collecting memories. In Harbour.Space I met different people coming from different nationalities and professional professors. Initially, I was worried about living away from my home country. But, sooner than later, I realised coming out of the comfort zone gives some meaning to life. I still believe in one thing: Luck may open the door, but it's your hustle that keeps it wide open.

Bio

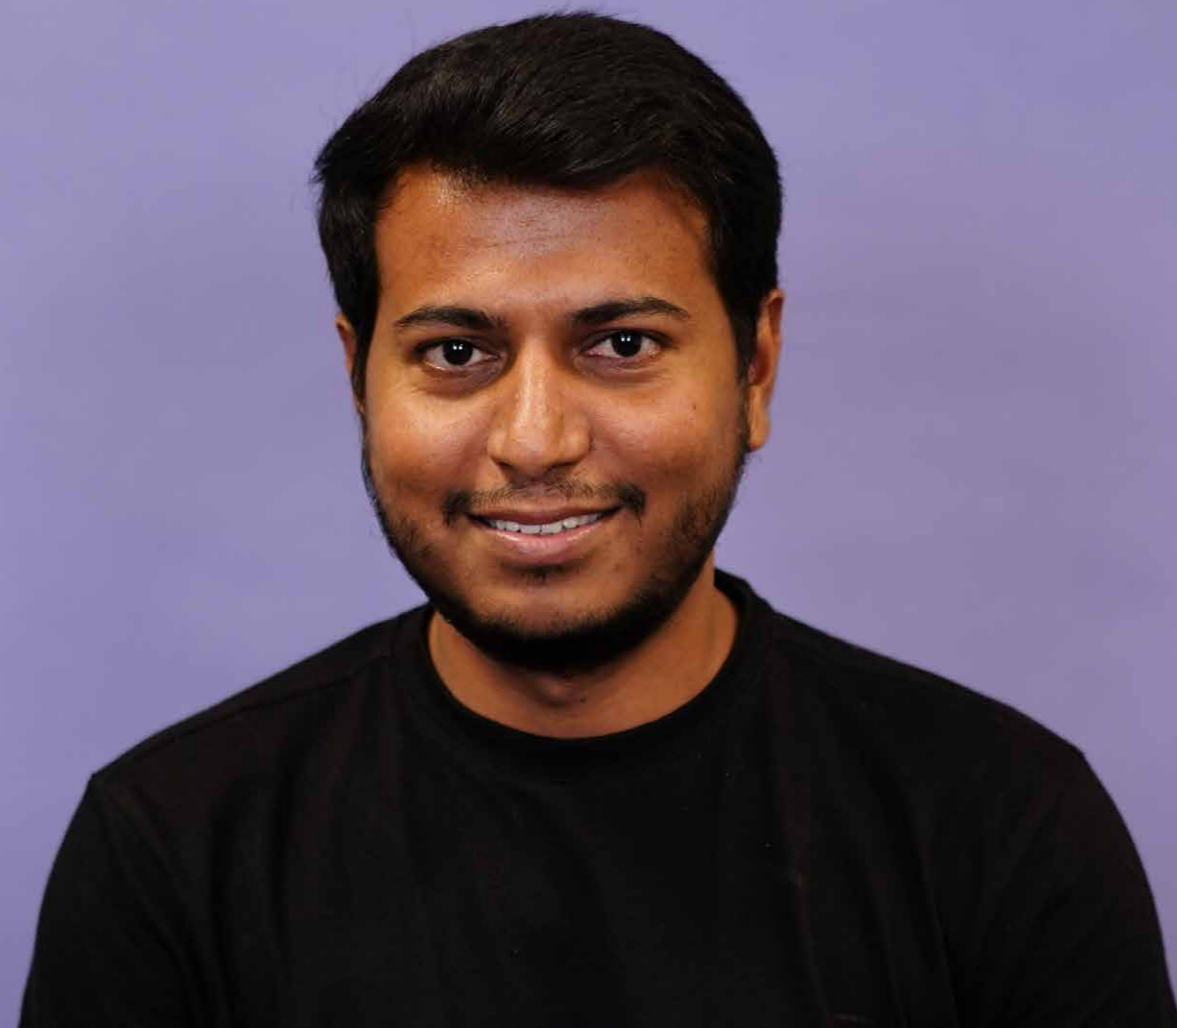

Abuzar was born and brought up in India. He graduated in computer science & information technology. He worked in different companies in diverse tech stacks. While working on AI/ML projects, he thought he needed to upskill and he landed in Harbour space for a master's degree in data science. Choosing a unique university and the city of prodigies was a very good choice for him. Now, he is aiming to work for a tech company in Barcelona. He believes in continuous and lifelong learning.

Miguel Celma

<https://www.linkedin.com/in/miguel-celma-30b489194>

Quote

After being at this university for 3 years, I have met a lot of amazing people that changed my life in ways I couldn't even imagine. Some friends became mentors, some mentors became friends. As the years passed, I said goodbye to some old friends and said hello to some new. Now it is my turn to say goodbye, and I cannot be happier to have been able to grow with the university and students.

Bio

Miguel Celma, originally from Caracas, Venezuela, moved to Spain in 2016, finally joining Harbour.Space in 2019 within a week of finishing high school. Being at Harbour.Space helped broaden his view on the future ahead, not only by improving his hard skills in coding and development, but also by giving him more opportunities to learn something new - be it the art of pitching, creating paintings with sound or designing websites. The current plan of battle ahead of Miguel looks bright - lots of coding, new challenges of development and, of course, painting with sound as a passion project.

My Harbour.Space journey was life-changing. Thanks to my amazing professors and the best classmates I've learnt a great amount of skills, both professional and social. Due to the freedom of our university, I had a chance to attend classes from numerous different programmes. I'll forever remember and be grateful for this experience.

Bio

Nikolai was born and raised in Moscow, but at the age of 13 he moved to Barcelona, Spain. He graduated from ESIS School in 2020, during Covid times. He began studying at the University of Toronto, but because of the pandemic and the resulting online education, he decided to look for a different school where he could attend in-person and found Harbour.Space. The three years Nikolai spent at HS were amazing for him. He had a chance to try himself in Data Science and High-tech Entrepreneurship. His journey gave him a great set of skills that he's now eager to implement. After his graduation he's planning to keep working on his Capstone project.

Urban Animals NFT

 Miguel Celma, Victoria Rogatinskaya

Urban Animals NFT is a 12-chapter collectable story that combines arts and entertainment. Each Urban Animals NFT allows the holder to receive deliverables to complement the story and, in some cases, become a part of the show with their voice and talent. It is 2050, Irashi, the apocalyptic asteroid, is near, daily life is operated by robots, and seven urban animals set out to enjoy earth and recover their freedom after the abrupt desertion of human beings and their beloved pets. Slowly, they start writing a new world order: the Urban Animals era. Urban Animals NFT is a collection of 7500 NFT's created by AniMaL Studio.

<https://www.urbananimals.io/>

Case Study

EmoVideoTran

 Serhii Denysov

The project is a translator and editor of educational (speaker-centred) videos based on artificial intelligence. The main goal is to create a voice translation using an auto-generated voice, with the transfer of emotions and intonations. This is necessary to significantly expand the reach of educational videos and provide the same experience for all viewers, regardless of their native language. Also, we will implement AI-based speech quality estimation and feedback for speakers.

Client Project

ForceFlow

 Daniel Enrique Cordovés Borroto

It's a CLI application that allows programmers to submit, check standings, get inputs and outputs of problems on the Codeforces platform. It is coded in NodeJS and uses Codeforces API to perform these operations, paired with an open source parser to parse problem statements.

Force*Flow*

Client Project

SIMSAR

 Maimoona Al Wahaibi, Filipp Skatershchikov, Temirlan Baibolov, Chi Nguyen

The capstone project is centred around building a user-friendly web application that serves as a platform for property owners and landlords. Its primary focus is on effectively managing income and expenses related to tenants. The application will boast a robust tracking and notification system, ensuring prompt payments and keeping both parties informed. Ultimately, the project aims to simplify the rental process, facilitate better communication, and deliver a smooth and efficient experience for property management.

 Ilya Yarmalkevich

My capstone project focusses on the experiences I collected while working for Harbour.Space's partner project, Leagues of Code. It highlights the projects that I have been involved in, which products worked particularly well and which ones did not. On top of that, it reflects my personal growth throughout these past three years.

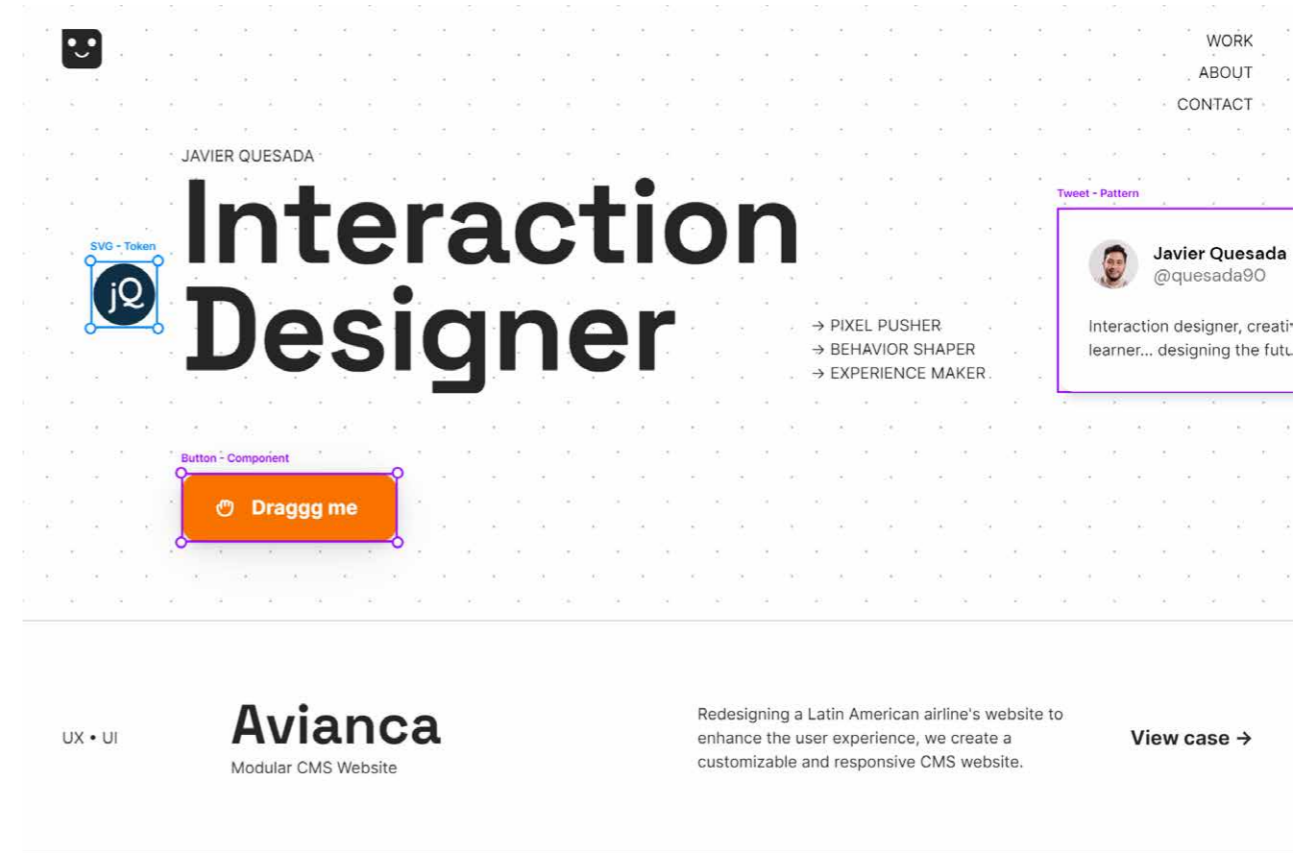

Leagues of Code

Internship

Nacar / Hewlett-Packard

 Javier Quesada

Case study on the structure, methodology and process that an interaction designer has to follow to work in a large technology company that must follow worldwide brand standards to maintain consistency.

Internship

Capgemini

 Laura Grinblat

For my capstone, I'm delving into the world of UX/UI design and consulting at Capgemini. My focus is on enhancing user experiences and creating intuitive interfaces for various projects. I aim to explore innovative design solutions, analyse user feedback, and implement improvements that align with industry best practices.

Portfolio

Portfolio

 Akshay (Ash) Khairmode

It reflects the person I want to become and the type of work I want to pursue in the future. I have showcased the work I have done, as well as what sets me apart and makes me unique. It also highlights the projects I have been involved with in the past, particularly those related to product design.

Portfolio

Portfolio

 Carolina de Montis

My focus lies in showcasing a diverse range of projects, demonstrating my skills and creativity, and leaving a lasting impression on potential employers. I'm dedicated to creating a powerful portfolio that will serve as a key asset in securing a job as a UI designer.

<https://carodemontis.com/>

Ciao!

My name is Carolina, a UI designer from Rome looking to start working as a junior in an agency alongside experienced designers to enhance my knowledge and skills.

Inbounds

 Fares Al Khouli

Inbounds is an athlete recruitment platform that helps talented and dedicated athletes in the MENA region get professional opportunities and college scholarships globally. My focus is to help these talented athletes display and showcase their talents where they may otherwise never have gotten the chance to. We aim to do so by connecting them to professional scouts and college recruiters around the globe.

Start-up

CloudStation3

 Fortune Max-Eguakun

CloudStation3 is a project that aims to allow anyone with a browser and a gaming controller to play resource-heavy games on whichever hardware they are on by outsourcing the computational load to a different machine. This allows for someone on a phone or a Mac to play a heavy game like Assassin's Creed without running the game itself, but instead using their device as a medium for the server actually running the game. It also allows for playing games like a local co-op even when miles away from each other. The original idea was birthed when, on coming to Barcelona and with my sister leaving for college, we could no longer easily play campaigns in co-op anymore, as we both didn't have consoles handy nor gaming PCs and were far apart. The project seemed like a good mix of various fields I have some expertise in, while also meeting a personal need.

Beautify

 Ivan Dmitriev, Vladimir Bushuev, Adam Alkhansvili

The Beautify app represents a novel approach to social connection by leveraging advanced face ID technologies. By focusing on user verification as a primary metric for matching, the app aims to create connections between individuals with similar aesthetic values. This approach ensures mutual respect amongst users, reinforcing the positive climate inside an app's community. The app's design and functionality may resonate with users who value a broader and more nuanced dating experience.

Start-up

Alta

 Juan Chozas Sumbera, Antje Notteboom, Supatsara Rodratsa (Rose)

Our mission is to connect and inspire altinha enthusiasts worldwide by providing a central platform for discovering locations to play altinha and fostering a vibrant community. To do so, we will create an app for users to find people to play altinha with and places where altinha is played. We will emphasise sportsmanship and good vibes with a karma system that leverages user feedback to build the profiles of players they encounter.

ARFÉ

 Masha Sredina

ARFÉ is a groundbreaking startup that speaks to the common challenge faced by young, gifted artists: The financial barriers that stand in the way of showcasing their talents. At the heart of our solution lies a welcoming space – a vibrant café infused with artistic energy. Here, artists are offered the opportunity to exhibit their creations free of charge, facilitated by an innovative voting system. Our overarching mission is to cultivate a supportive and inspiring community that fosters creativity, bolsters confidence, and encourages collaboration. Picture a realm where the aroma of freshly brewed coffee harmonises with an array of artistic expressions, creating an atmosphere where artists can truly flourish.

ReScooter

 Nikolai Paleev, Andrey Paskonin

With ReScooter we are trying to create a city-friendly e-scooter sharing. Our mission is to bring a modern, safe, convenient and eco-friendly form of mobility and a bigger choice for people in places where sharing of such forms of transportation is unavailable or banned. We made our idea flexible enough to be able to work in an environment with strict legislation towards such forms of transportation and sharing. We're planning to become part of urban mobility, thus being safer and more convenient for both city population and government.

Thesis

Predictive Modeling for Inventory Allocation

 André Cesário Pereira Werner

This capstone project applies explorative data analysis, customer segmentation, and time series forecasting to data from a used vehicle retailer group. It is centred around unveiling insightful patterns and trends in the market, understanding customer behaviour and preferences, and identifying key customer segments for targeted sales strategies. Furthermore, it incorporates the development of a model to predict future sales patterns, thereby providing a robust framework for informed strategic decision-making and efficient resource allocation. Ultimately, this project aims to offer a data-driven approach that can significantly contribute to the growth and profitability of the retailer group in the used vehicle sales industry.

Improvement of Security Camera System

 Ariel Cruz

It reflects the person I aspire to become and the type of work I aim to pursue in the future. I have showcased the work I have done, as well as what sets me apart and makes me unique. It also highlights the projects I have been involved with in the past, particularly those related to product design.

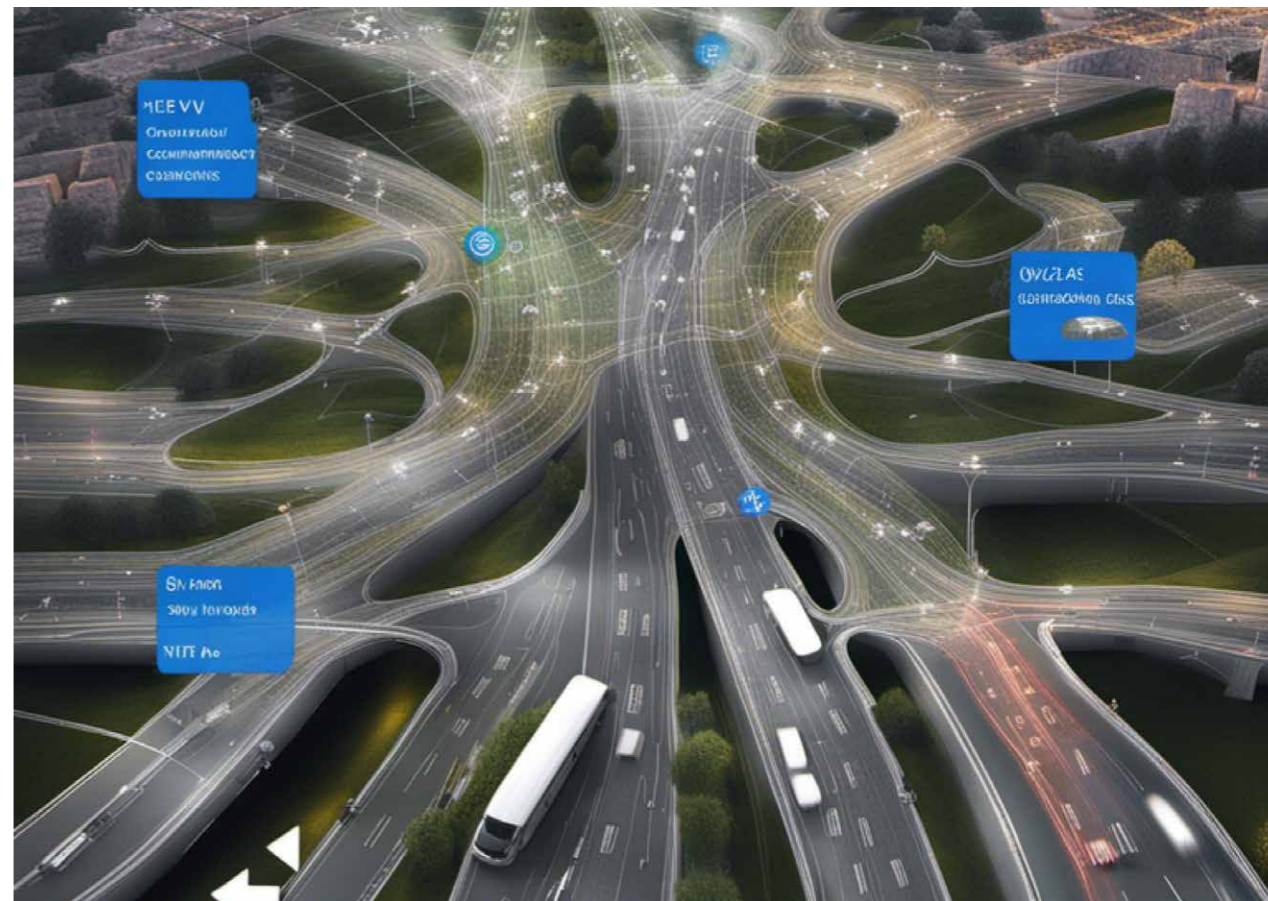

Thesis

A Dedicated Highway in Romania

 Bardan Iorgu Iustin

This thesis aims to explore the potential implementation of C-V2X communication and connected cruise control for a platoon of human-driven and autonomous vehicles in Romania, with a focus on a dedicated highway. The main objectives of this study are: To provide a comprehensive overview of C-V2X technology and connected cruise control, their benefits, challenges, and current applications. To explore the legal and privacy implications, focusing on GDPR requirements for data protection in the context of connected vehicles. To conduct a case study on the feasibility of a dedicated highway for connecting cruise control in Romania. To propose strategies for integrating human-driven and autonomous vehicles in platoons, while addressing the potential concerns related to data privacy.

Thesis

Thai Building Material Supplier

 Kultida Bhumina

This study addressed contractor churn in a Thai building material supplier, using machine learning for predictive modelling and causal inference methods to understand churn's causal factors. Analysis of customer data revealed significant contributors, like order value and purchase frequency. The findings offer insights for churn prevention and guide customer retention strategies, emphasising both prediction and causal understanding.

Thesis

Computational Humor Detection

 Mariano Rodriguez

Discuss the previous research that influenced the topic of selection. It explores the concept presented in a published SEPLN paper, which examines the strength of transformer models when faced with language changes. Moreover, it outlines the strategy employed for the HuHu - 2023 task, including a comparison with contemporary methods like chat-gpt and the trade-offs associated with them.

<https://github.com/mjason98/huhu23>

Computational humor detection for the Spanish language

Thesis

Futures Spaces

 Natalie Worth

Much of our daily life has shifted online. With the introduction of technology and the world wide web, we now live in digital spaces—but are we in control of these spaces, or are they controlling us? Virtual and augmented experiences can help us create alternative realities, but we need the power to create our own realities so we have control over them. Future Spaces explores how people can participate in the metaverse—instead of solely consuming it. It aims to encourage involvement and empowerment by providing a platform for user-generated creations that augment our real-world environments with 3D tools and curation.

Thesis

WellnessWizard

 Santiago Paiz

My capstone project is centred on crafting a unique application, WellnessWizard, that is focused on promoting healthy eating habits by offering users a detailed diet plan. The main objective of the project is to use computational techniques and algorithms to generate diet plans that correspond to users' nutritional needs. The aim is to encourage healthier lifestyle choices, reduce the risk of nutrition-related diseases and improve general well-being.
