

HARBOUR SPACE
UNIVERSITY

**GRADUATING
CLASS 2022**

We are sending our graduates out into the world with a bang. As they move on to the next chapter of their lives, we will be looking forward to their upcoming adventures as they reshape the world.

This year, the graduating students are from the bachelor's and master's programmes in the departments of Front-end Development, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Data Science, Cyber Security, Fintech, and Computer Science.

In this booklet, you will find information about our graduating students and their experiences of studying at Harbour.Space University. You can also find details about the main projects they are pitching to the investors during the Demo Day.

During this past year, our students have worked hard and gained experiences that allowed them to achieve substantial growth in both technical and social skills in the newly emerging fields of today. In the future, we will be looking forward to seeing them prosper in their careers!

We have created a pamphlet as a look back on your educational journey that you braved alongside us, and we hope that when you look through it, you'll remember all the great things you've accomplished during your time in Barcelona. We certainly will!

Kamran Elahian

Harbour.Space University Founding

Co-Founder and Chairman of
Harbour.Space University, Emeritus
Director McKinsey & Company

We believe careers should be fulfilling, exciting, and meaningful. We exist to make this happen. Attending university is as much about finding your feet in the world and discovering your own drive and passion as it is about acquiring skills, knowledge and experience.

From day one at Harbour.Space, your prospective career takes centre stage and we facilitate your development and your networking and create opportunities to help you take charge of your future. What comes after Harbour.Space? The sky is the limit. Don't be shy, reach for the stars.

Svetlana Velikanova
Harbour.Space University
Co-Founder & CEO

HARBOUR SPACE

UNIVERSITY

About Harbour.Space University

Harbour.Space is a university created by entrepreneurs for entrepreneurs. We focus on meeting the demands of the future, while traditional education providers are too often stuck in the past.

We're one of the only European institutions completely dedicated to technology, design and entrepreneurship, and our interdisciplinary courses are taught by some of today's leading professionals. Our aim is not only to equip students with the knowledge to take on the real world, but to nurture, create and shape tomorrow's tech superstars.

Key Facts

- Founded in 2015.
- Offers degrees in Mathematics, Computer Science, Data Science, Cyber Security, Fintech, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Product Management and Front-end Development.
- Faculty comprised of the most accomplished professionals and industry leaders from around the world, who continuously scrutinise the curriculum to ensure students focus on realtime useful subjects.
- On our state-of-the-art campus knowledge flows freely.

TIME ≠ MONEY

Youth is not for sale. That's why we teach highly relevant and real-world responsive courses that give students a head-start even before graduation. Our programme leaders continuously scrutinise the curriculum to ensure students focus on realtime useful subjects. We teach 3-week intensive courses throughout the year, offering more learning in less time, on flexible and adaptable schedules.

STUDENTS ARE SUPERSTARS

Harbour.Space exists for one purpose only: to help young individuals pursue knowledge, so they can progress into fulfilling and meaningful professional futures. We offer the fundamental knowledge, skills and guidance that give students the chance to make anything happen. Our students are not cogs in a machine. We celebrate our human approach by cultivating team work, interdisciplinarity, empathy and curiosity.

NO COMPROMISES

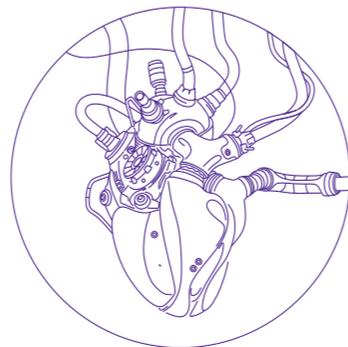

If you get a place at Harbour.Space, you get the best education. The programmes are tough and our students must work hard. We don't sell quick-fix coding or data science courses, because they don't exist. Only with very solid foundational knowledge of universal core concepts in science can students grow to move forward indefinitely, no matter how much the world around us changes.

UNIVERSITY REINVENTED

Leaders in business are the students' personal teachers. We don't care about titles and we don't do red tape: we hire teachers based on experience and expertise, just like in the real world. We are the most relevant university of our age.

TECH ♥ DESIGN

Great ideas and their realisation seldom come from specialists: they come from all-round visionaries. But presently, technology and design are in an arranged marriage: they are together because this is what's expected. We are cultivating a love marriage between the two, and we are the only university in Europe to do so. We're doing this because the two naturally depend on one another, but experience a great lack of understanding. Interdisciplinarity is our love potion – expect sparks.

Quote

Although I was enjoying every moment of doing a work-study program in Harbour.Space it was far from an easy journey. It's the perfect way to learn to handle pressure and manage your time and resources wisely. On a personal level, meeting friends from all over the world and sharing with them a lot of great food and long working hours make the experience priceless and totally rewarding.

Bio

Abdullah is a Syrian Software Engineer who is passionate about Data Science. He was awarded a sponsored scholarship by OneRagtime to study for a Master's in Data Science at Harbour.Space because of his diverse expertise in software engineering and data science. He is growing a skillset to create production-ready machine learning and data science applications.

The year passed at a supersonic speed. I'll miss being here. I'll miss practicing body language for presentations at 8 in the morning. And I'll miss coffee at The Alchemist (I hope they add Bubble Tea to their menu). To all the new students for the upcoming year – it's gonna be a tough one, with many ups and downs, but don't be sad because you taste defeat, let the defeat have a taste of you.

Bio

Abhijeet (sounds like: uh-bee-jeet) is from Mumbai, India. He completed his Bachelor's in Graphic Design from École Intuit. Lab, a private design university, in 2020. In April 2021, he decided to join Harbour.Space University, wanting to learn from some of the biggest names and experienced individuals associated with the university. With a passion for things that fly, Abhijeet's current focus is to explore the aviation and aerospace industries as an Interaction Designer. In the long term, he is going to be a successful entrepreneur.

Quote

Harbour.Space was a beautiful experience, an intense year packed with new experiences in which people from different countries got to know each other, became friends, worked together in a team, and came up with unique ideas while working on projects. I had the opportunity to learn from some of the top professors who are experts in their fields and willing to share their knowledge and experience. I am grateful for the opportunity to study interaction design, which will make people's lives easier and will be the most in-demand profession in the present and future. It also allows me to improve my skills and learn how to advance my career.

Bio

Abinash is originally from Ranchi, India. He completed his Bachelor's in textile design from NIFT Bengaluru. He worked for a textile company for a while, and when he got bored with his office life began looking for a university in Europe to pursue a master's in UI/UX Design. He discovered one in the beautiful city of Barcelona, Spain, Harbour.Space. Here he learned about Interaction Design and how to design a solution that works well in the context of use, where a designer's focus should be when the product is built, and how users will interact or use the product most conveniently.

I've met some of the nicest, most interesting, and most skilled students at this university. No matter where life takes me next, the experiences and the friends this university has given me have been invaluable for my future. As a final reminder, grab any opportunity that presents itself. You never know where it will lead. The best things happened when I challenged myself outside my comfort zone. It'll either work out or it doesn't, but I haven't looked at anything as a failure, just something to learn from.

Bio

A little less than a year ago, Abrar was working as an architect in Muscat, Oman. This year, she joined Harbour.Space as an Interaction Design Master student. Safe to say – a lot can happen in a year! Joining Harbour.Space exposed her to a great number of student talent, as well as leaders in the industry. Abrar learned a lot from collaborating with students and teachers and is truly inspired by the multidisciplinary approach some courses had.

This year has been a once-in-a-lifetime and enriching experience, full of growth in both academic and practical domains. It was an experience full of challenges, and it was a pleasure for me to meet with talented professionals from around the globe during my journey. Living in Barcelona and studying at Harbour.Space introduced me to different backgrounds and cultures, and being a part of an engaging team grew my hard and soft skills. They led us to unbelievable creativity. I'm proud to be a part of it and am looking forward to seeing what they will achieve in the future.

Bio

Adel was born in Syria in 1996. He studied for a Bachelor's in Computer Science, and he is a multiple-time world finalist in the famous ICPC competitive programming competition. He moved to Barcelona and chose Harbour.Space University to get his Master's in Data Science to broaden his knowledge and experience in artificial intelligence and computer vision and to apply it in the real world. During his studies, he and his team were the regional finalist in the "call for code" competition by IBM with the "well well" project, and also started working as a software engineer at the region's leading e-commerce platform and digital marketplace, Noon in Dubai.

Quote

For me, spending my time here is all about stepping out of my comfort zone. Things that I always thought I knew really well, it turns out there is still a lot I can learn. Working with people with different backgrounds and levels of experience also made me grow, as it was never easy and sometimes challenging. While there are still a lot of things I need to improve, overall I enjoyed my time here at Harbour.Space. I'm glad to have met some talented people from every corner of the world, and during the year we spent a lot of time traveling, trying new things, building healthy habits together, and learning from each other. I hope we are still able to keep in touch years from now until we cross our path together again.

Bio

Adryan Wicaksono was born in Jakarta, Indonesia, where he took his bachelor's studies in Visual Communication Design. After graduation, he spent three years as a graphic designer, mainly working on branding projects and graphics for physical space. Then, Adryan decided to expand his skillset to include interaction design, specifically wanting to learn more about User Interface Design. While at Harbour.Space, Adryan collaborated on different projects with people from diverse backgrounds and nationalities.

It feels so hard to describe the experience I had in a mere paragraph. I have grown a lot as a person and have become more confident. To all the teachers/guest speakers, you guys were awesome. You have pushed me to dream even bigger. The thing I most cherish is the friends I have made here, which includes everyone from professors to students and people from the office too. There is a special code word that only my special friends would understand; "Curva Curva Curva." So it's a shoutout to everyone who understands this, and I hope this reminds you of some of the great moments we had together. Have a great life. Stay hungry, and stay foolish.

Bio

Ansh is from India. He did his undergrad in Computer Science and is a self-taught web developer. He is one of the students who was offered a 100% scholarship for the Front-end Master's programme because of his excellent knowledge of the field. While at Harbour. Space, he had the opportunity to run small workshops for designers to get started with HTML and CSS. He also interned at the company Facenote. He is passionate and wants to be a Digital Product Manager in the future.

I have reflected often on what the Harbour.Space experience meant to me throughout my one year here. As I'm writing this close to my graduation, the word that comes to my mind is, 'limit.' My limits in professional, social, and personal life were revealed to me slowly throughout the year. Knowing these limits not only revealed to me a part of myself that was unknown, but also allowed me to push myself further in my future work.

Bio

Aslan is a UX Designer. He did his Bachelor's in Social Sciences at the City, University of London. By the third year of his studies, he developed an interest in tech and started learning to code. After his bachelor's, he obtained a graduate diploma in Software Engineering. Shortly after, while freelancing as a developer, he came across UX & UI Design as a field and totally fell in love with how it perfectly combined research and technical skills. He came to Harbour.Space to meet like-minded people and further develop his skills as a product designer.

Quote

My stay at Harbour.Space has been unlike any other educational experience that I've had before. World-class educators (both from academia and industry), talks by remarkable speakers, and close contact with Barcelona's ecosystem are the most salient features of Harbour.Space and the ones that I personally enjoyed the most. Also, the pool of talent in the student population is difficult to find elsewhere.

Bio

Carles graduated in Economics from UPF (Barcelona) in 2020. After considering several career paths, he realized that his traditional university training had not prepared him for the constantly changing world that we live in. He came to Harbour.Space to pursue an MS in Data Science to equip himself with a modern toolkit of skills suitable for the 21st-century job market. Carles is now happily working as a Data Analyst at Vermut, a Barcelona-based start-up that wants to redefine what it means to be a senior in our society.

It's crazy how many things there are to learn. And in every single one of them, you can make a career. The only way to find out about them is just to try stuff. That's how all of a sudden I started coding, and then making 3D, and then motion design, and then mixing them all together. All of my classmates did the same. Everyone is just trying things here, sometimes it works out, and sometimes it doesn't. The point is to keep on looking.

Bio

Egor was born in Russia and right after finishing high school decided to go abroad and study Interaction Design. Having a background in photography he wanted to develop skills in UI Design. However, during his studies at Harbour.Space he also got into coding. While studying, he created multiple projects involving both design and tech.

Harbour.Space is an experience I will always cherish. The number of awesome people I met in one year was just incredible. The teachers are the industry legends who are open to sharing their methods and experiences. I will remember Yan's coffee every morning, having his amazing cup of coffee just makes the day even better. I will never forget the awesome images Irene made for me, allowing me to use DALLE-2. I am so grateful and glad that I could be part of this awesome space, to everyone who made this possible, and to everyone who was just part of this journey. Thank you & good luck.

Bio

Gaurav was born in India. After completing his B. Des in UX Design, he worked for various startups, designing end-to-end products as a Lead Experience Designer. He wanted to specialise in the domain of design & technology; thus he came to do his Master's in Interaction Design at Harbour.Space Barcelona. He is an architect of digital spaces who specialises in bridging the gap between people and technology using design as the medium. During the master's, Gaurav worked on multiple design projects and design interfaces for companies in Web3/crypto space. Gaurav plans to pursue a career in creating and designing the interactions and interfaces of the future.

This year was a mix of stress, fight, and happiness. Fighting to achieve my goal, stress in learning new things in a short time, and happiness once a class ends and you get the grade. Remember to learn more you have to be helpful and good in a team. You have to learn the rules of the game first, and then you have to learn how to play better than the others. Be happy, work hard. Good luck 🍀❤️

Bio

Israa graduated from the University of Technology and Applied Science in 2020, specializing in Information Security. She joined Harbour.Space to complete her Master's of Computer Science through the Women in Tech programme, which was sponsored by Petroleum Development Oman, a leading petroleum company in Oman. Israa was one of Harbour.Space's virtual students, which can be difficult, but she managed to master the skills which she previously did not know. She is planning to continue developing her skills in computer technologies and study to acquire more knowledge and master new skills.

Jordan Flórez

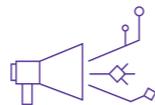

<https://www.linkedin.com/in/jordan-florez-cubides/>

Quote

Though it was a stressful year with a lot of uncertainty because of the covid and all the things that were happening in the world, I loved all the experiences I had at Harbour.Space. The classes and the staff made the whole experience even better and having classmates that became good friends and knowing more about them and their culture are things that don't have a price.

Bio

Jordan Flórez was born in Bogota, Colombia. After finishing his college career in Management in Creative Industries, he decided to increase his knowledge and skills in Digital Marketing. That's how he found Harbour.Space and here he found everything that he was looking for in a Digital Marketing Masters Programme, plus it was in Barcelona!

<https://www.linkedin.com/in/joukha-alhosni-02b809194>

Quote

This year has been challenging, but it has also been one of the best parts of my life. I grew as a designer and as a person. I'll remember the friendships I made, the memorable moments, and learning not to give up. Modules were online, which was not easy, but they were very interesting. I believe the knowledge we got at the university and from friends we met during our studies will help us become better.

Bio

Joukha Abdullah Alhosni was born in Oman in 1995 and graduated from The University of Technology and Applied Science in Oman with a Bachelor's in Computer Engineering. She then joined Harbour Space to complete a one-year Master's in Computer Science through the Women in Tech programme, which was sponsored by Petroleum Development Oman. Joukha studied virtually, which was difficult, but she managed to master skills. She is planning to develop herself in Front-end Development.

Julius Berthold

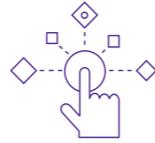

<https://www.linkedin.com/in/julius-berthold/>

Quote

I never thought there was such an inspiring place as Harbour.Space. The mix between so many different nationalities, characters, and disciplines, paired with a very special style of teaching is truly unique to me. Through Harbour.Space, I've made wonderful friendships, grown on so many levels, and found out where I belong professionally.

Bio

Julius was born and raised in Germany. Initially, he studied mechanical engineering and business but knew that at some point he needed to switch to something more creative. However, this process was characterised by very different stations. He started by working in a board member's office of a large automotive company. After that, he spent time in Miami managing marketing activities in Latin America. And as the last step before Harbour.Space, he identified investment opportunities at a VC. Ultimately, he came to Harbour.Space which was the place that encouraged him to make the career switch he was always pursuing.

Being at Harbour.Space has been one of the best experiences of my life. I have met very special people with whom we have shared many moments and professional interests. I have improved my English, and have met teachers with very different visions than usual who make you think big. I will always be from Harbour.Space!

Bio

Laura Ferro was born in Barcelona, Spain. At 24, she graduated with a degree in Accounting and Finance. After several years of experience in the banking, accounting, events, and marketing sectors, she decided to develop and learn much more from the world of marketing. At this moment, Harbour.Space appeared, and it was the perfect opportunity, the ideal ecosystem that she was looking for her professional and personal growth. Now her future is getting closer, and she sees herself undertaking her project and putting into practice everything she has learned. Throughout the year, she has applied what she has learned and now wants to continue and launch everything she has prepared and take it to the next level.

Laurenz Gregor

<https://www.linkedin.com/in/laurenz-gregor-051a8a206/>

Quote

There is nothing usual about this university. A year full of new experiences, new people, and interesting classes with an intense schedule. The past 15 modules, at times, were hard on me. Especially jumping every 3 weeks from finance to marketing and then back to business. Don't get me wrong, switching between that many different topics in a short time can be super exhausting, but on the other side, I never got as close to seeing through the eyes of a CEO. This year brought me much closer to what is waiting for me. There is nothing we can't do! With all the amazing people I have met from teachers to students, I believe we can be a big part of forming the future. Thank you!

Bio

Laurenz Gregor was born in Austria, where after graduating from high school joined the Austrian Army. With a big interest in business and new technologies, Laurenz did his BSc in Management and Design at a University close to Vienna, where he discovered his love for Entrepreneurship. The perfect way to combine business with new ideas and innovative concepts. Wanting to follow his dream, he applied to Harbour.Space to be a part of the High-tech Entrepreneurship programme where he started to develop his first high-tech project.

Quote

Harbour.Space is an ecosystem of creativity and passion. It radiates through its halls, within its classrooms, and, most importantly, in the hearts and minds of its students. In 12 short months, professors became peers, strangers became friends, and laughs became bonds that will last a lifetime. We may have all come to Harbour.Space looking for different things, but we are all leaving it with the memories, experiences, and knowledge that we shared.

Bio

Lucas Shaff hails from Reno, Nevada, where he also acquired his Bachelor's in Journalism. Post-graduation, he began his marketing career at a luxury mountain resort, and there he quickly moved up the ranks before becoming a Marketing Manager. After four years, it was time for Lucas to broaden his horizons and move on. After falling in love with Spain in college and looking for a Master's programme that broke the traditional norms of education, Harbour.Space was the perfect fit. After graduating, Lucas plans to open a strategic marketing agency to help SMBs.

By no means have I had the most smooth sailing year here, but it is in the midst of turbulent waters one has the chance to test their faith and perseverance. I have seen my peers persevere beyond what they had previously imagined was their limit, and I do not doubt that this entrepreneurial spirit will lead us all to greener pastures in our respective businesses. Although I didn't have as much time with all my peers, I know I've fostered lifelong friendships and business partners, and I wish you all the best moving forward.

Bio

Manu Opara was born in Port Harcourt, Nigeria, and moved to the United Kingdom in 2016 to pursue a Bachelor's in Mechanical Engineering. During his degree, he started his fine jewellery business, Urban Stones. Upon completion of the degree, he came to Harbour.Space to do a Master's in High-tech Entrepreneurship in order to strengthen his entrepreneurial skills and expand his jewellery business into a new watchmaking brand.

Miguel Celma

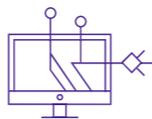

www.linkedin.com/in/miguel-celma-30b489194

Quote

After being at the university for 3 years, I have met a lot of amazing people that changed my life in ways I couldn't even imagine. Some friends became mentors, some mentors became friends. As the years passed, I said goodbye to some old friends and said hello to some new ones. Now it is my turn to say goodbye, and I cannot be happier to have been able to grow with the university and its students.

Bio

Miguel Celma originally from Caracas, Venezuela, moved to Spain in 2016 and joined Harbour.Space in 2019 within a week of finishing high school. Being in Harbour.Space helped broaden his view on the future ahead, not only by improving his hard skills in coding and development, but also by giving him more opportunities to learn something new - be it the art of pitching, creating paintings with sound, or designing websites. The current plan of battle ahead of Miguel looks bright - lots of coding, new challenges of development, and, of course, painting with sound as a passion project.

Mizuki Takagi

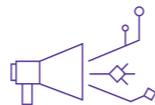

<https://www.linkedin.com/in/mizuki-takagi/>

Quote

Compared to the beginning, I became more and more adapted to Spain, and I almost forgot the importance of my Japanese politeness and punctuality. Of course, in a good way! Regarding my capstone, this idea came to me because I came to Barcelona and learned at Harbour.Space. I am grateful to the people who contributed to this project, encouraged me, and improved my idea! It was a precious time, and I won't waste it! All the experiences of the past year were experiences that I could never have in Japan. Thank you for all the wonderful encounters.

Bio

Mizuki spent most of her life in Japan. While in college, she majored in Economics and Management, but marketing was her favorite subject. After graduating, she joined an advertising agency and worked there for two years, but Mizuki wanted to dive deeper into marketing from a broader perspective. She found Harbour.Space University and decided to join so she could put herself in a new environment and try new things. It has been an amazing environment where students strive together, no one judges anyone, and there are wonderful teachers. She wants to continue her career as a marketer and implement what she's learned at Harbour.Space while trying to start her own business.

Roham Hosseini

<https://www.linkedin.com/in/roham-hosseini/>

Quote

These past three years have made me who I am. Harbour.Space and the amazing people I met here introduced me to the adult world, and I will forever remember the memories created and the lessons learned. All my mistakes, the heated drunk conversations over random topics, the mentorship from faculty, and the days before final projects that faded into the night will stay with me no matter where I go. I will appreciate and support my incredible friends who joined me on this journey until my last day.

Bio

Roham was born in Iran and moved to Spain at 13. Before joining Harbour.Space, he knew that he wanted to be a free spirit and do big things and that he wouldn't survive the industrialized assembly line that is traditional education. That's how he ended up at Harbour.Space. Roham was a big dreamer; through his education here he learned how to translate his dreams into reality and got introduced to the tools needed to make them happen. He made incredible friends from dozens of countries all over the world, and with his global network, the sky is the limit. With Roham's future being a mix of business, tech, and politics, you will read about him in the news someday.

Susanna Tragni

<https://www.linkedin.com/in/susannatragni/>

Quote

Intense. That describes the year at Harbour.Space. Arriving at immersive and beautiful Barcelona, meeting and connecting with amazing people from all over the world, delivering my everything in each module, the entire experience is intense. To all the crazy "jump head-first" classmates, we made it!

Bio

Susanna Tragni was born in Brazil. Eight years after she finished her Bachelor's of Social Communication and Advertising, she decided to pursue a MBA in Digital Marketing. Already an experienced digital marketer with eight years of working in the industry, Susanna decided to deepen her knowledge and learn about the latest industry trends, especially technology and innovation. While at Harbour.Space Susanna had the opportunity to show what she learned during a Digital Marketing Challenge. She also played an important role during International Women's Month, being very active throughout the entire month's activities and events.

Takuma Yoshimi

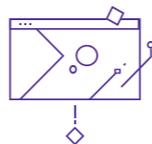

<https://www.linkedin.com/in/takuma-yoshimi/>

Quote

I am very happy that I met all of you. It was the first time I lived abroad so I was nervous in the beginning, but everyone was very nice, and I felt at home quickly. Thank you. I have made life-long friendships with people from all around the world, which I am grateful for.

Bio

Takuma is from Japan. He studied economics for his bachelor's and worked in sales for a few years. After quitting that job, he went to a coding boot camp. He always wanted to live in Europe and also be able to work anywhere, so Takuma decided to study for a master's. Harbour.Space was amazing because he not only was able to learn from experts, but he also made good friends and spend unforgettable time with them. After graduation, he plans to work as a front-end engineer in Europe and make software that helps people.

Támara Spir

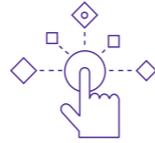

<https://www.linkedin.com/in/spirtamara/>

Quote

Get out of your comfort zone and enjoy the small details that this world is showing you every single day. Breathe, and don't let the discomfort change who you are. Get it done in the best way so you can enjoy life without anything bugging you. Be the best way you can be for yourself with the good and bad things, don't be hard on yourself. Love and so much love.

Bio

Támara Spir is from Colombia, and she came to Barcelona to pursue the dream of becoming an Interaction Designer. Lucky her, she found Harbour.Space where she could explore the different skills and processes that they teach her. She enjoyed her life in Barcelona, where she felt it was meant to be. She is exploring a new life being an Interaction Designer and building her own studio.

Tarek Halabi Hakim

www.linkedin.com/in/tarek-halabi-hakim-297829200

Quote

Learning and working from active people in the industry was intense but incredibly beneficial! Having a real-time perspective of how things work from a higher position has motivated me to improve on every aspect of marketing; I can't wait to see where things go from here.

Bio

Tarek Halabi Hakim is a Lebanese student with a background in Marketing and Advertising; he came to Spain to pursue a master's and a career in Digital Marketing. While at Harbour.Space, Tarek had the opportunity to work on his start-up idea, Harmonica, with colleagues from every field. He is ready to take on any digital marketing position, hoping he will one day launch his start-up.

Quote

Be always prepared, you never know when and where the next opportunity will come knocking on the door. There were a lot of challenges in this journey while working on projects and learning skills I didn't have before. But it was amazing because we had to implement them immediately, which defined the major objective of "Experiential Learning". The most loved part of the Harbour.Space journey was meeting various people and industry leaders from around the world, and working with them was always fun.

Bio

Vepa Nrusimha is from Hyderabad, India. He completed his Bachelor's in Computer Science and Engineering and worked on government & network security projects. While he was pursuing his engineering degree, there were a lot of fintech start-ups emerging with ample opportunities in India which gave him a spark to learn and understand the Start-up ecosystem. This spark opened the opportunity to join the Masters of Fintech programme at Harbour.Space University, where he learned and applied various skills which helped him to define his goals. He had an opportunity to learn and work with various industry leaders. Vepa will continue working on reliable fintech ideas and projects.

Quote

I am grateful for the opportunities Harbour.Space has provided me. Despite being an unconventional education format, I truly believe I have learned more here than I would have in a more traditional environment. I am grateful to all the amazing teachers and staff members that made all this possible. With a final word of gratitude to all my fellow students, you've all been delightful.

Bio

Victor-Ismael Reeves was born in Mali. His father is Australian, and his mother is Franco-Malian. Having such a mixed background meant that he traveled a lot. So moving from Australia to Barcelona and studying Computer Science seemed like a no-brainer to him. Barcelona is conveniently located and is a very beautiful city. He chose Harbour.Space as his preferred University, and he does not regret his choice. During his time at Harbour.Space, he developed the necessary skills and knowledge to feel confident with his goal to begin his post-graduate education.

Master in High-tech Entrepreneurship

Vladimir Lobachev

<https://www.linkedin.com/in/vladimir-lobachev/>

Quote

Shoutout to everyone that I had an amazing chance meeting with! Shoutout to Svetlana, our CEO, for making us all write this. To Steph, for extending the deadline for this twice. Shoutout to Hannes S. Chopra for opening the eyes of many of us. To Adriano for keeping it smooth and funny. Shoutout to Don and Irene for being real. To Polina and Sanzhar for looking after us. To Anzhelika for keeping the campus exceptionally clean. To Antonio our fav conserje. To The Alchemist bar with the cheapest espresso shot in town. And of course, to all my friends and teachers over the years. Thank you people, that was truly amazing.

Bio

Born in Russia, Vladimir spent most of his conscious life studying and living outside of the native borders. As a retired tennis player, he graduated from the University of York, UK, with a Computer Science degree. His passion for coding at the time nurtured him to pursue the Cyber Security Master's programme at Harbour.Space, but soon after lines of code turned into cells in spreadsheets as he inclined more towards entrepreneurship. Currently, he remains in Barcelona, where he continues his work building a room of opportunities for dreamers and enthusiasts in the music industry.

PhazeRo Apprenticeship

 Ahlam Yusuf

I work at PhazeRo as a Data Science Apprentice. The projects I've worked on allowed me to dip my toes into several Data Science roles, from Data Engineer to Database Administrator, coupled with the modules I took at Harbour.Space, they have made me expand my technical skills.

The logo for PhazeRo, featuring the word "PhazeRo" in a bold, black, sans-serif font. The letter "R" is stylized with a blue diagonal slash through it.

Case Study

Cafe Street

 Ansh Arora

Café Street is a family-run coffee business with a physical location in Barcelona. Its speciality is coffee, but it also offers a variety of snacks and baked products to customers. The goal was to build an online presence for Café Street to add more trust to the brand, bring in more customers, and allow the owners to sell their products online. The project involved three phases. The first phase was the discovery phase, where the needs, requirements, and implementation details were finalised. Then was the design phase, which involved building a suitable design from the findings of the discovery phase. The final phase was the development phase, which involved building the final product.

Case Study

PhazeRo Apprenticeship

 Hisham Al Hashmi

I worked as a Data Scientist in a team of six people to handle the different projects that the team took on. My responsibilities ranged from project management and documentation all the way to solution design and writing code.

Energy Optimization

 Laila Al Julandani

The study aims to develop a system that predicts the consumed energy with a high level of accuracy. In this hypothesis, generators produce more energy than consumers use to prevent shortages. Deplorably, the amount of energy produced exceeds the amount consumed, which has led to high costs and consumption. To produce the right amount of energy, there needs to build an accurate model to predict the required energy consumption.

Case Study

Well Well Well: AI to find best well location

 Mazen Hassani, Adel Saadeddin, Pierre Schwab

Well well, our project uses machine learning and robotics expertise, we propose a 2-part solution to this problem: The first module is a free web application that takes a single input, the GPS location of any point in the world. Using a combination of geological features maps, satellite imagery, and Machine Learning, this web application will then predict the best places to drill a water well within walking distance. And we also thought about the countless people who don't have access to clean water and do not have access to a mobile phone or the internet. We added a second module to our project, which is a cheap portable device, costing under 10 USD. This device will store some precomputed ideal locations for wells from all around the world. It'll be able to detect the current GPS location of any user and guide them to the nearest ideal place to drill a water well. The scientific literature is full of examples of how machine learning can help predict Groundwater mapping potential, using information available on maps like the distance to the nearest river, the vegetation nearby, the soil composition, and so on.

Churn Prediction for a Fitness Coaching Ecommerce using Machine Learning

 Yuri Alcántara Olivero

Online personal training is now more relevant than ever. From 2019 to 2021, “home fitness” became a hot word in Startup companies and investments, and the online fitness market continues to grow at a high speed, especially after the outbreak of the pandemic. The main goal of this project is to build a machine learning model to perform churn prediction for a fitness coaching e-commerce.

The logo for VATION features a stylized 'VA' symbol above the word 'VATION'. The 'VA' symbol is composed of three thick, black, slanted parallel lines. The word 'VATION' is written in a bold, black, sans-serif font.

Opara Luxury

 Manuchimso Opara

Opara Luxury is a luxury watchmaking and jewellery brand that focuses on using high-end manufacturing and exclusive material analysis to create Africa's first luxury watchmaker. The brand focuses on giving back to the people of Africa by using sustainable methods of gem production and manufacturing while training and employing African youth in the art of watchmaking. All this is achieved by rooting the core of our brand in artistic expression and fundamental watchmaking.

Startup

SHYR

Róbert Müller, Roger Kinoti, Támara Spir

SHYR is focusing on helping founders get consistent support in the early stages of startup creation. We are creating a gamified incubator that will take founders from an idea into a business with investors while keeping close collaboration and mentorship. In our platform, we are bringing together entrepreneurs, mentors, and investors to collaborate in a more data-driven and transparent way.

SHYR

Startup

Staria Technologies SL

 Sergi Roig Guillamon

Staria creates smart solar lighting solutions for exterior spaces through sustainable energy use. We want people to forget about seeing a luminaire as just a point of light. We will use sustainable energy with the state of the art technologies to create a green IOT device.

Startup

SunchroStation

 Vladimir Lobachev

A high-quality and versatile food catering service for large-scale music festivals and private events. We come directly to you to prepare tasty snacks and meals to accommodate all your customers' needs.

Startup

Talia

Abdullah Al Saidi, Hussein Hasan, Judit Moya Oliach

Computer Vision based Video Analysis software for indoor climbing sport. Our objective is to create a mobile app that can analyze the footage of a climber and give him information about his performance and progress as well as his achievements to create a gamified experience for the user.

Startup

Xponod.es

 Laurenz Gregor, Francesco Oliverio

Xponod.es offers the easiest way to explore, compare, and shop online through an interactive visualization to make online shopping more efficient and fun. Overwhelming choices and outdated designs are one of the main reasons for high shopping cart abundance rates. Xponod.es is a tool that helps online exploring and shopping enthusiasts with their decision-making. Our goal is to offer an easy filtering method to show less but get more out of it. Xponod.es is a more personalized and interactive shopping tool that always lets you choose between 3 options.

xponod.es

Startup

YesChef!

 Narisa Luanporn, Giovanna Alonso

YesChef!, is a platform solution for restaurant operators' inventory reordering process. We digitize ingredients consumption, embed predictive models to alert for shortages, and recommend optimal inventories that the restaurants should have.

Thesis

Improvement of Security Cameras Systems

 Ariel Cruz

The goal of this project is to create three different machine learning models to solve different problems and create a program able to communicate with each model to manage the notifications with the user.

I am a template to help you get the correct aspect ratio.

Duplicate this file, insert your project image and upload a jpg/png into the google survey.

I dont have any image so far :)

Thesis

Station and Traffic Prediction of a Shared Bike System: A Case Study of Barcelona's Bicing

 Carles Zato

Bikes-Sharing Systems (BSS) are becoming an increasingly common means of transportation. Officials in most major cities are embracing them to reduce emissions, air pollution, improve traffic flow, and increase public health. A recurrent problem that users of BSS find is either no bikes in a station or no free slots to park. I gathered a dataset of Bicing (Barcelona's BSS) and performed several machine learning tasks. Amongst them are bike station clustering to find spatiotemporal patterns in bike use and traffic prediction to identify when a station is likely to run out of bikes or parking slots.

Thesis

Microscopy Image Tracker

 Ekaterina Podrzhko

Microscopy Image Tracker is a tool that will simplify the work of scientists. It detects movements of microtubules (polymers that form cytoskeleton) on microscopic images based on computer vision methods.

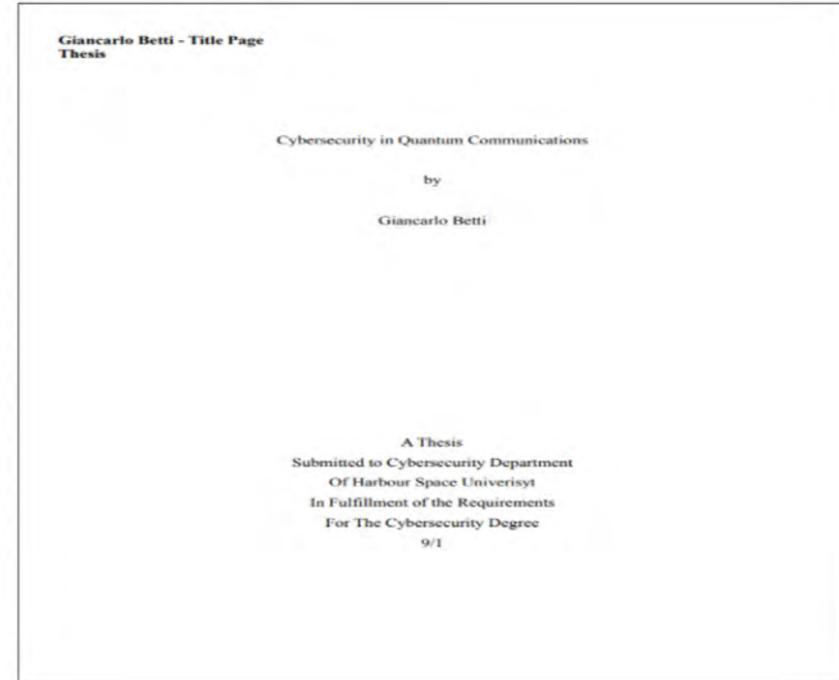

Thesis

Cybersecurity in the Age of Quantum Communication

 Giancarlo Betti

My thesis talks about the relationship between quantum communications and cybersecurity. My focus is to dive into the importance one has with the other. As communication methods evolve and more data is transmitted at faster speeds, cybersecurity is as important as ever. It keeps getting harder to properly monitor traffic on a network, especially when it comes to quantum communications since it's being transmitted at incredible speeds. I aim to find ways of keeping quantum communications secure, as well as find risks and vulnerabilities that may come with using them.

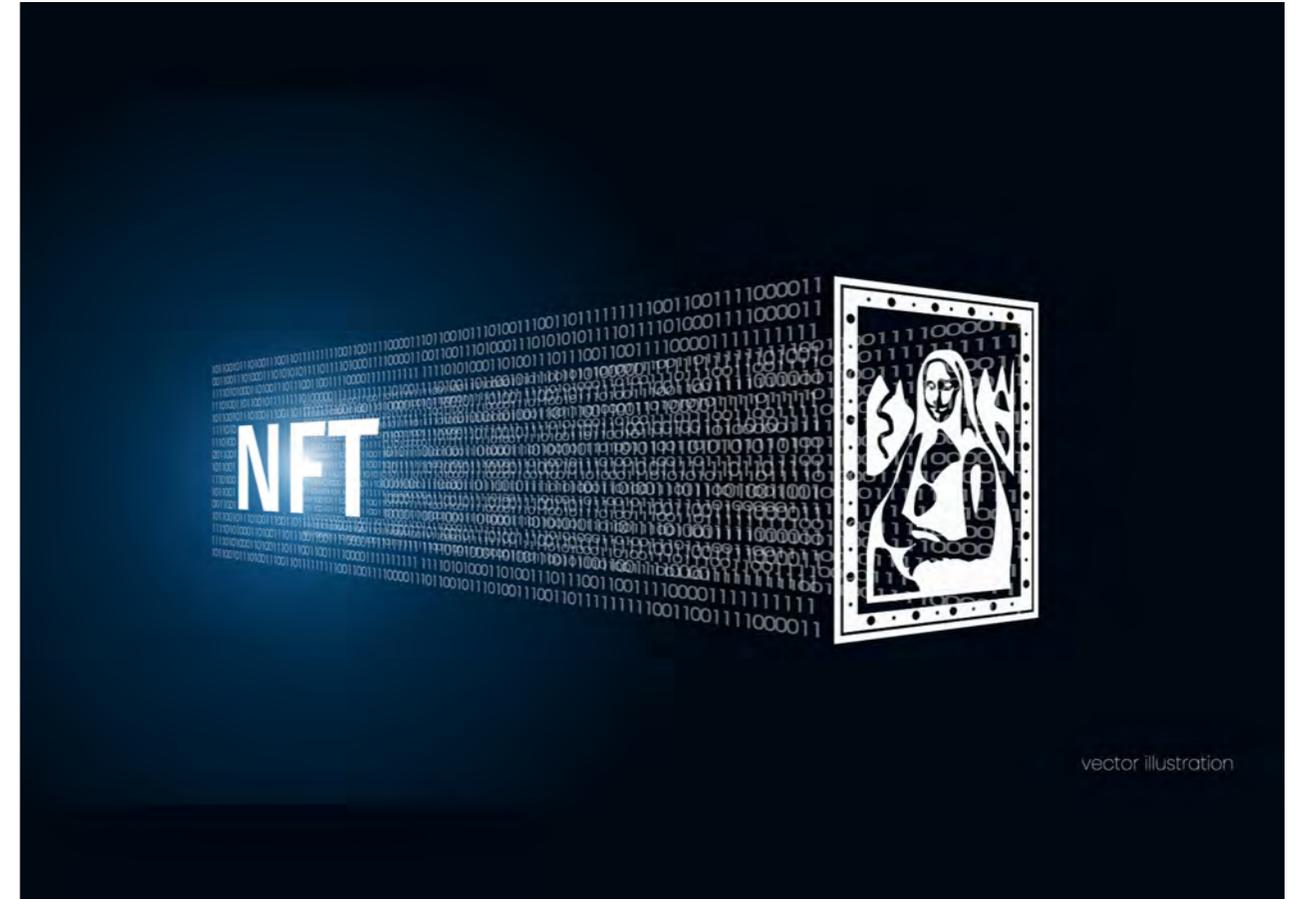

Thesis

Tokenising and Fractionalizing Assets

 Karim Mango

The thesis investigates the implications that come with tokenising and fractionalizing assets and how that disrupts financial markets and affects liquidity, pricing, and trading of an asset. It also investigates the impacts this will have on different types of assets/markets.

Thesis

Kubernetes Wizard

 Mathias Bigler

Kubernetes is by definition modular and pluggable and because of this, a lot of decisions have to be taken regarding adding additional tools to the Kubernetes environment since Kubernetes is not enough by itself in production systems. So my project is about simplifying these choices by centralizing all tools and learning about the user in question to suggest more personalized tools.

Which tools are you looking for?

Chosen tools

- Infrastructure as Code
- Authentication
- Environment Isolation
- Container Registry
- Application Packaging
- Version Control
- Repository Structure
- Continuous Integration
- Continuous Deployment
- Traffic
- Networking
- Service Mesh
- Storage
- Observability
- Credentials
- Development Environment
- Backup Clusters
- Security

 Infrastructure as Code	 Authentication	 Environment Isolation	 Container Registry	 Application Packaging
 Version Control	 Repository Structure	 Continuous Integration	 Continuous Deployment	 Traffic
 Networking	 Service Mesh	 Storage	 Observability	 Credentials
				

Thesis

Qubit Disenchantment

 Victor-Ismael Reeves

My thesis revolves around the current problems associated with quantum computers. There is a big discrepancy between what the general public believes quantum computers are and what they are. I explore what led to this and try to dispel all the hype associated with quantum computing.
