SPACE**  
UNIVERSITY

**GRADUATING  
CLASS 2024**

We are sending our graduates out into the world with a bang. As they move on to the next chapter of their lives, we will be looking forward to their upcoming adventures as they reshape the world.

This year, the graduating students are from the bachelor's and master's programmes in the departments of Front-end Development, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Data Science, Cyber Security, Product Management, Computer Science, and Digital Transformation. In this booklet, you will find information about our graduating students and their experiences of studying at Harbour.Space University.

During this past year, our students have worked hard and gained experiences that allowed them to achieve substantial growth in both technical and social skills in the newly emerging fields of today. In the future, we will be looking forward to seeing them prosper in their careers!

*We have created a pamphlet as a look back on your educational journey that you braved alongside us, and we hope that when you look through it, you'll remember all the great things you've accomplished during your time in Barcelona. We certainly will!*

**Kamran Elahian**

Harbour.Space University Founding Advisory  
Board Member, Founder and Chairman  
Global Innovation Catalyst LLC

**Ingo Beyer von Morgenstern**

Co-Founder and Chairman of  
Harbour.Space University, Emeritus  
Director McKinsey & Company

We believe careers should be fulfilling, exciting, and meaningful. We exist to make this happen. Attending university is as much about finding your feet in the world and discovering your own drive and passion as it is about acquiring skills, knowledge and experience.

From day one at Harbour.Space, your prospective career takes centre stage and we facilitate your development and your networking and create opportunities to help you take charge of your future. What comes after Harbour.Space? The sky is the limit. Don't be shy, reach for the stars.

## UNIVERSITY

### About Harbour.Space University

Harbour.Space is a university created by entrepreneurs for entrepreneurs. We focus on meeting the demands of the future, while traditional education providers are too often stuck in the past.

We're one of the only European institutions completely dedicated to technology, design and entrepreneurship, and our interdisciplinary courses are taught by some of today's leading professionals. Our aim is not only to equip students with the knowledge to take on the real world, but to nurture, create and shape tomorrow's tech superstars.

### Key Facts

- Founded in 2015.
- Offers degrees in Mathematics, Computer Science, Data Science, Cyber Security, Fintech, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Product Management, Front-end Development, and Digital Transformation.
- Faculty comprised of the most accomplished professionals and industry leaders from around the world, who continuously scrutinise the curriculum to ensure students focus on realtime useful subjects.
- On our state-of-the-art campus knowledge flows freely.
- Harbour.Space programming team has won a gold medal at the International Collegiate Programming Contest (ICPC) World Finals in Luxor, Egypt, outperforming institutional giants like Stanford, MIT, Cambridge, and Oxford.

## TIME ≠ MONEY

Youth is not for sale. That's why we teach highly relevant and real-world responsive courses that give students a head-start even before graduation. Our programme leaders continuously scrutinise the curriculum to ensure students focus on realtime useful subjects. We teach 3-week intensive courses throughout the year, offering more learning in less time, on flexible and adaptable schedules.

## STUDENTS ARE SUPERSTARS

Harbour.Space exists for one purpose only: to help young individuals pursue knowledge, so they can progress into fulfilling and meaningful professional futures. We offer the fundamental knowledge, skills and guidance that give students the chance to make anything happen. Our students are not cogs in a machine. We celebrate our human approach by cultivating team work, interdisciplinarity, empathy and curiosity.

## NO COMPROMISES

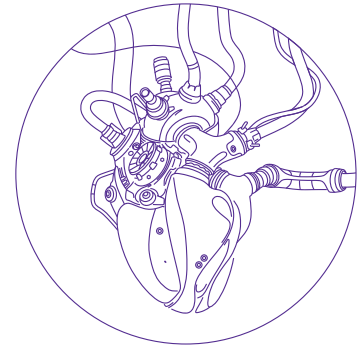

If you get a place at Harbour.Space, you get the best education. The programmes are tough and our students must work hard. We don't sell quick-fix coding or data science courses, because they don't exist. Only with very solid foundational knowledge of universal core concepts in science can students grow to move forward indefinitely, no matter how much the world around us changes.

## UNIVERSITY REINVENTED

Leaders in business are the students' personal teachers. We don't care about titles and we don't do red tape: we hire teachers based on experience and expertise, just like in the real world. We are the most relevant university of our age.

## TECH ♥ DESIGN

Great ideas and their realisation seldom come from specialists: they come from all-round visionaries. But presently, technology and design are in an arranged marriage: they are together because this is what's expected. We are cultivating a love marriage between the two, and we are the only university in Europe to do so. We're doing this because the two naturally depend on one another, but experience a great lack of understanding. Interdisciplinarity is our love potion — expect sparks.

# Alejandro Estrada

 <https://www.linkedin.com/in/alejoestradaaa/>

## Quote

*"Thanks to Andy, Kenda, Rio, Jenna, and Brie for being great mentors. To Steph and Julia for making my Harbour.Space experience warm and gentle. And to my classmates like Donggeun, Carla, Oskar, Saba, Oke, Angelo, Stepa... for bringing joy at different stages of this journey. Beyond any skill or knowledge, the people are the greatest gift Harbour.Space has given me."*

## Bio

Born and raised in Medellin, Colombia, Alejo has a background in music and digital communication. He worked in marketing within the music industry and led local initiatives for a global startup. He pursued a Master's at Harbour.Space University to expand his marketing expertise and build a robust professional network. Alejo transformed a side project into the operational growth hacking agency, Los Del Tren, and is focused on establishing its success in Spain.

## Quote

*I want to congratulate my colleagues and wish them great success! The people I communicated with at Harbour Space will always remain in my mind and heart. I will always be happy to stay in touch with them.*

## Bio

Aleksandra is from Saint Petersburg, Russia. She earned a bachelor's degree in applied mathematics and programming. She initially applied her skills in economics and pure math but eventually discovered her genuine interest in data science at Harbour Space University. There, she met numerous outstanding people, honed her soft and hard skills, and identified her main direction for self-development. She plans to delve deeper into data science from practical perspectives, focusing on entrepreneurial opportunities.

### Bio

Gautam was born in Hyderabad, India. After completing his Bachelor's degree in Communication Design, he worked as a graphic designer for a few years, gaining valuable experience and knowledge by working under some of the best designers in the country. His passion lies in creating enjoyable experiences through design and storytelling. While seeking to grow as a designer, he discovered the Interaction Design program at Harbour.Space. His aim now is to re-enter the design field with a whole new set of skills.

### Quote

*I'm beyond grateful for my year at Harbour.Space! It has allowed me to finally pursue the career I had only dreamt of before and has opened doors to incredible opportunities. The amazing teachers, staff and classmates from all over the world really made this experience special.*

### Bio

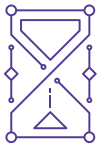

Born and raised in Berlin, Greta has explored diverse career paths in business and set design before transitioning into UX/UI Design. After earning an online certificate in UX Design and gaining experience at a digital agency in Berlin, she wanted to refine her skills through the Interaction Design Master's of Harbour.Space. Throughout the degree, Greta delved into UX and UI Design, as well as motion and 3D design, broadening her expertise and creative horizons.

### Quote

*If you want to give me a mental breakdown, just ask me "where are you from?" and enjoy the show. I also hope that one day I will be able to meet sunrise with the best mentor in the world. But until then I shall keep training. As the last thing though, people telling you that you can't do things should be the strongest fuel for you to do it, prove them wrong and at the end give them a public shout-out with all their motivational quotes. Stay feral, stay passionate.*

### Bio

Sati is a witch's pot mixture of a person, being half Turkish/Russian, always hopping between countries. This adventurous lifestyle lead her to explore different subjects, but CS stood out most. Ironically, she was taught by HS teachers in high school, and ended up studying further in the same university. She was quickly amazed at the academic flexibility, using this to broaden her horizons. Although her future steps are shrouded in mist, she eagerly hopes to pursue Creative Development as her next big adventure.

### Quote

*Something as vast and mesmerising as a forest has once started from a single tree. That same majestic tree which towers over the landscape has once started from a small seed. Everything great has humble beginnings. I am certain that the time we spent here is the beginning of our success. Each one of us can grow into a tree, but only together will we ever make a forest. Thanks everyone for being together with me all this time. Let's continue to grow together in the next chapter of our lives as well.*

### Bio

Temirlan is a student from Kazakhstan who has been passionate about programming long before university. He has started coding since the age of 12 and has decided to pursue a Web Development career. The years spent in Harbour.Space were a crucial part of his life. He has met a lot of wonderful, talented and kind people who inspired him to take on bigger challenges and ultimately made him become a better person. He wants to keep pursuing his career and reach new heights together with his new friends.

# Valentine Lang'at

### Quote

*It's been a privilege to be part of such an incredible, diverse community that has shaped my experience in meaningful ways and broadened my perspective. From 3AM debugging marathons to spontaneous adventures, I'm grateful for every moment. To the people who made it bearable with hugs, laughs and shared struggles: you've made this journey memorable. To the teachers who challenged and inspired me, I'll always carry your words with me. I leave with a full heart and can't wait to see where we all end up. See you in Forbes ;)*

### Bio

Valentine, a Kenyan native with a diverse global background, has a deep passion for the tech world and its potential to be a catalyst for change in Africa. She began her studies in Malaysia but was drawn to Barcelona by the opportunity to expand her worldview, joining Harbour.Space to learn from industry experts. Through hands-on projects, she deepened her technical expertise and strengthened her resolve to support women in STEM. Valentine envisions using her skills to make a meaningful impact.

### Quote

*I couldn't have dreamed of a better time during my student years. The university, the weather, the people, the food, the nightlife... everything the city offered was incredible. I loved every moment and wouldn't change a thing. I'm so glad I chose Harbour.Space University. The lifelong friendships I made, the invaluable experiences, and the memories from the past three years will forever be remembered. With pure happiness, gratitude, and excitement, I'm ready to start the next chapter of my life!*

### Bio

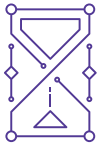

Valeri is a solution-driven, goal-oriented individual with a deep passion for technology and personal development. Originally from Bulgaria, he has a strong sports background, having competed professionally in tennis. At 15, he discovered programming and fell in love with it. Valeri joined Harbour.Space for its emphasis on practical experience and sought a modern university taught by industry experts. The future holds great potential for Valeri as he envisions transforming the payments industry into his home country.

*Harbour.Space was a launchpad for transforming my engineering insights into actionable product innovations. To my classmates – your creativity and drive were truly inspiring. Let's continue to innovate and push the boundaries of what's possible!*

### Bio

Valeriya Yamanova, a seasoned engineer since 2014 and a leader in building design innovations, ventured into product management to pioneer advanced digital solutions for the construction industry. At Harbour.Space, she enhanced her strategic and operational skills, culminating in the creation of BIT Frame, a platform set to revolutionize 3D project management. Valeriya aspires to continually drive technological excellence in her field.

### Quote

*Learning from top professionals worldwide, especially entrepreneurs like Kamran Elahian, Daniel Kozlov, Abdullah Al-Shaksy, and Eric Nobileau, was incredibly enriching. Their mentorship helped shape my entrepreneurial mindset and EdTech startup idea. They saw potential in me and motivated me to keep going. I'm deeply grateful for their guidance and excited about what the future holds.*

### Bio

Yasiris is a Deaf/HoH Industrial and Product Designer from the Dominican Republic. Her passion for solving real-world problems, particularly for people with disabilities, has earned her recognitions like Microsoft Azure Latin America 2022. She believes design and technology can greatly impact society, leading her to Harbour.Space to hone her skills. Founder of Deaf Pwr, she advocates for the Deaf community. Yasiris aims to build an EdTech startup to empower the Deaf and Hard of Hearing community.
