

**HARBOUR  
SPACE**  
UNIVERSITY @UTCC

**GRADUATING  
CLASS 2024**

We are sending our graduates out into the world with a bang. As they move on to the next chapter of their lives, we will be looking forward to their upcoming adventures as they reshape the world.

This year, the graduating students are from the bachelor's and master's programmes in the departments of Interaction Design, Digital Marketing, High-tech Entrepreneurship, Computer Science, Data Science, and Front-end Development

In this booklet, you will find information about our graduating students and their experiences of studying at Harbour.Space@UTCC. You can also find details about the main projects they are pitching to the investors during the Demo Day.

During this past year, our students have worked hard and gained experiences that allowed them to achieve substantial growth in both technical and social skills in the newly emerging fields of today. In the future, we will be looking forward to seeing them prosper in their careers!

*We have created a pamphlet as a look back on your educational journey that you braved alongside us, and we hope that when you look through it, you'll remember all the great things you've accomplished during your time in Bangkok. We certainly will!*

OP  
.SPA

We believe careers should be fulfilling, exciting, and meaningful. We exist to make this happen. Attending university is as much about finding your feet in the world and discovering your own drive and passion as it is about acquiring skills, knowledge and experience.

From day one at Harbour.Space, your prospective career takes centre stage and we facilitate your development and your networking and create opportunities to help you take charge of your future. What comes after Harbour.Space? The sky is the limit. Don't be shy, reach for the stars.

**Svetlana Velikanova**

Harbour.Space University  
Co-Founder & CEO

At Harbour.Space, we offer a balance of practical hands-on experience, frontier knowledge, and vision for future innovators. We like to think that Harbour.Space is the starting point in equipping our students with the necessary tools to shape their own futures—as well as paving the way for coming generations. We are confident that our graduates will leave the program inspired by new ideas, ready to make change in their next adventures.

We also look forward to creating a global network of future leaders who are motivated to build a compassionate world for the current and future generations. Be ready to embrace the everchanging present – the future is yours to design.

**Assoc. Prof. Dr. Sauwanee Thairungroj**

## UNIVERSITY

### About Harbour.Space University

Harbour.Space is a university created by entrepreneurs for entrepreneurs. We focus on meeting the demands of the future, while traditional education providers are too often stuck in the past.

We're one of the only European institutions completely dedicated to technology, design and entrepreneurship, and our interdisciplinary courses are taught by some of today's leading professionals. Our aim is not only to equip students with the knowledge to take on the real world, but to nurture, create and shape tomorrow's tech superstars.

### Key Facts

- Founded in 2015.
- Offers degrees in Mathematics, Computer Science, Data Science, Cyber Security, Fintech, Interaction Design, Digital Marketing, High-tech Entrepreneurship, Product Management, Front-end Development, Digital Transformation, and International Business.
- Faculty comprised of the most accomplished professionals and industry leaders from around the world, who continuously scrutinise the curriculum to ensure students focus on realtime useful subjects.
- On our state-of-the-art campus knowledge flows freely.

**UTCC** University of  
the Thai Chamber  
of Commerce  
**มหาวิทยาลัยหอการค้าไทย**

## About University of the Thai Chamber of Commerce

UTCC is defined by its commitment to foster innovation-driven entrepreneurship. It was conceived in 1940 as a private, non-profit higher education institution to offer the most modern and transformational business education.

It remains on track with this mission and is considered today as one of ASEAN's leading university in trade and services, growing alongside its community of partners in academia and industry.

## Key Facts

- Accredited as a university in 1984
- Recognised as an Apple Distinguished School for 2015 – 2020
- Set up the Innovation Driven Entrepreneurship Centre (IDE) in partnership with MIT
- Integrated the Stanford course 'Designing Your Life' into its curriculum
- Offers E-commerce certification in partnership with Alibaba
- Established Harbour.Space @ UTCC campus in 2020 in Bangkok, Thailand

## STUDENTS ARE SUPERSTARS

Harbour.Space exists for one purpose only: to help young individuals pursue knowledge, so they can progress into fulfilling and meaningful professional futures. We offer the fundamental knowledge, skills and guidance that give students the chance to make anything happen. Our students are not cogs in a machine. We celebrate our human approach by cultivating team work, interdisciplinarity, empathy and curiosity.

## UNIVERSITY REINVENTED

Leaders in business are the students' personal teachers. We don't care about titles and we don't do red tape: we hire teachers based on experience and expertise, just like in the real world. We are the most relevant university of our age.

## TECH ♥ DESIGN

Great ideas and their realisation seldom come from specialists: they come from all-round visionaries. But presently, technology and design are in an arranged marriage: they are together because this is what's expected. We are cultivating a love marriage between the two, and we are the only university in Europe to do so. We're doing this because the two naturally depend on one another, but experience a great lack of understanding. Interdisciplinarity is our love potion – expect sparks.

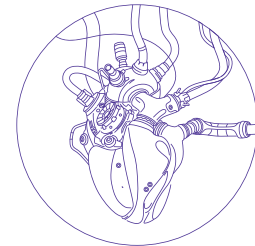

## NO COMPROMISES

If you get a place at Harbour.Space, you get the best education. The programmes are tough and our students must work hard. We don't sell quick-fix coding or data science courses, because they don't exist. Only with very solid foundational knowledge of universal core concepts in science

can students grow to move forward indefinitely, no matter how much the world around us changes.

## TIME ≠ MONEY

Youth is not for sale. That's why we teach highly relevant and real-world responsive courses that give students a head-start even before graduation. Our programme leaders continuously scrutinise the curriculum to ensure students focus on realtime useful subjects. We teach 3-week intensive courses throughout the year, offering more learning in less time, on flexible and adaptable schedules.

### Quote

*Harbour.Space@UTCC was a journey of growth and unexpected victories for me. Every three weeks brought magical moments of unforgettable learning experiences, and sharing every exciting minute with my supportive peers was the most memorable part.*

### Bio

Ailah, originally from the Philippines, has lived in Thailand since she was seven. Fresh out of university with a Bachelor's in Biomedical Engineering, she sought to stand out in the competitive job market and knew she wanted to start her own business someday, particularly in her passion area—healthcare. She saw Harbour.Space@UTCC as her stepping stone, providing the opportunities she needed to transform herself from an inexperienced young woman into a confident, empowered individual ready to take on the next chapter of her professional journey.

# Payal Agarwal

 <https://www.linkedin.com/in/payal-agarwal-037478107/>

### Quote

*Kudos to the amazing people I met during my year at Harbour.Space@UTCC. The time spent here will be cherished forever, shaping every aspect of my life. Each mentor offered profound insights and teaching experiences. I'll fondly remember the small outings our ID gang enjoyed—truly unforgettable. Harbour.Space@UTCC has taught me to embrace extroversion and boldness in all endeavours. I'll miss every aspect of this transformative journey.*

### Bio

Payal Agarwal from India proudly reflects on the past year as a gift she gave herself. Studying at Harbour.Space@UTCC has been the most rewarding experience of her life, offering invaluable knowledge and practical skills in interaction design. This journey empowered her to push creative boundaries and explore new horizons. She cherishes the memories of late-night brainstorming, hands-on projects, and the support of a vibrant community. As she moves forward, Payal is eager to apply these experiences to future endeavours.

## Bio

Rujipas spent his entire high school life in a scientific programme, with some keen interest in social science as well. After hearing about Harbour. Space@UTCC from his school counselor, he took the risk and joined the data science programme. His first experience at the university was a culture shock when he had to create a business by himself, but that shock gradually turned into an interest in digital marketing. He is now trying to balance his technical and non-technical interests in his life.

 <https://www.linkedin.com/in/samsonpius/>

## Quote

*I don't think I'll ever forget the day of my first presentation with Irene, the most talked-about teacher at Harbour.Space@UTCC. I messed up my group's presentation because I was so nervous. I felt terrible and went back to prepare intensely. When I returned, I came back stronger, and the whole class was like "Wow!" By the end of the module, we emerged as the best group. Shout out to Yves, Rick, and Jackie, who pushed me to my limit.*

## Bio

Samson was born and raised in Nigeria. He is the founder of Lite Studios Limited and holds a bachelor's degree in transport management technology, though he never felt comfortable with it. He began learning digital skills like graphic design and photography, and along the way, he discovered Harbour.Space@UTCC. Harbour.Space@UTCC helped him dive deeper into the creative world, and according to him, his life changed from the day he arrived. His biggest takeaway was learning how to build a successful brand. Despite some stress, he enjoyed his time here and hopes to pursue another master's in software engineering in the future.

# Tam Do

 <http://linkedin.com/in/tam-doo-doo>

### Quote

*This year has been an incredible journey. Stepping out of my comfort zone, immersing myself in a new city, and experiencing different cultures have all contributed to my creative growth. The bonds I've formed with amazing people here will last forever and have been a significant part of my development as both a designer and a person. The friendships and cultural experiences have truly enriched my life and fuelled my creative journey.*

### Bio

Tam Do was born and raised in Can Tho, Vietnam. After earning a Bachelor's Degree in International Business and gaining two years of experience as a Graphic Designer, Tam decided to dive deeper into UX/UI Design and fortunately discovered the Interaction Design Programme at Harbour.Space@UTCC. The most valuable takeaway for Tam was the opportunity to learn from exceptional teachers who are experts in their fields. Additionally, she made many quality connections with her peers. In the future, Tam aspires to become a great designer, inspired by her teachers who have built a strong aspiration for her growth.

## Case Study

# License Plate Recognition for VMS

 Vetit Kanjaras (Way)

License Plate Recognition (LPR) is essential in applications like law enforcement, parking management, and traffic control. This report analyzes a project on LPR for Thai plates, emphasizing high accuracy and minimal inference time. Thai plates pose unique challenges due to script and design variations, impacting detection in real-world scenarios. The project addresses these challenges, balancing accuracy and speed, crucial for applications like toll collection and parking management. This study aims to advance LPR technology, offering insights for efficient and reliable systems.

### Capstone Project HS@UTCC 2024

---

#### Introduction

This report is made for showing some of Vetit's SKY ICT works from August 2021 until February 2024, a total of 2 years and a half. I began working at SKY ICT PCL. as an intern in Data Science and AI Developer in the Data&AI team within Interstellar Squad; this includes Character and Number Classification, multiple Detection models, and License Plate Recognition (LPR). The outcome of this project is the extensive knowledge and experience in Computer Vision Artificial Intelligence. I have been working with the team to successfully produce the fully integrated LPR system, which is deployed in office buildings, villages, and airports.

## Case Study

# Analyzing Exoplanet Atmospheres to Understand Earth's Global Alterations

 Vasilii Kotunov

The capstone project aims to investigate the atmospheric compositions of exoplanets. By comparing these with Earth's atmosphere, the project seeks to uncover patterns and insights that can help understand and predict Earth's climate changes. The focus is on leveraging data science and astrophysics to contribute to the broader understanding of planetary atmospheres and their impacts.

## Case Study

# Group Insurance Claim Prediction

 Rujipas Varathikul (Due)

Since the profit of the insurance company is based on two main factors namely the premium collected from the policyholders as an income and the cost of hospitalization as the loss. In order for the company to combat this marginal loss/gain, the company need to be in control of the cost aspect which is not an easy task. The goal of the project is then to simulate the loss of each insurance policy through the eyes and data of the insurance company in order to appropriately set up each policy's premium according to the risk factor and reduce the overall loss.
